Shockey turn their expertise to the world of fermented beverages in the most comprehensive guide to home cidermaking available. Uncultivated Andy Brennan, 2019-06-17 The best wine book I read this year was not about wine. It was about cider--Eric Asimov, New York Times, on Uncultivated Today, food is being reconsidered. It's a front-and-center topic in everything from

politics to art, from science to economics. We know now that leaving food to government and industry specialists was one of the twentieth century's greatest mistakes. The question is where do we go from here. Author Andy Brennan describes uncultivation as a process: It involves exploring the wild; recognizing that much of nature is omitted from our conventional ways of seeing and doing things (our cultivations); and realizing the advantages to embracing what we've somehow forgotten or ignored. For most of us this process can be difficult, like swimming against the strong current of our modern culture. The hero of this book is the wild apple. *Uncultivated* follows Brennan's twenty-four-year history with naturalized trees and shows how they have guided him toward successes in agriculture, in the art of cider making, and in creating a small-farm business. The book contains useful information relevant to those particular fields, but is designed to connect the wild to a far greater audience, skillfully blending cultural criticism with a food activist's agenda. Apples rank among the most manipulated crops in the world, because not only do farmers want perfect fruit, they also assume the health of the tree depends on human intervention. Yet wild trees live all around us, and left to their own devices, they achieve different forms of success that modernity fails to apprehend. Andy Brennan learned of the health and taste advantages of such trees, and by emulating nature in his orchard (and in his cider) he has also enjoyed environmental and financial benefits. None of this would be possible by following today's prevailing winds of apple cultivation. In all fields, our cultural perspective is limited by a parallel proclivity. It's not just agriculture: we all must fight tendencies toward specialization, efficiency, linear thought, and predetermined growth. We have cultivated those tendencies at the exclusion of nature's full range. If *Uncultivated* is about faith in nature, and the power it has to deliver us from our own mistakes, then wild apple trees have already shown us the way.

The Art and Science Of Cider Thomas Chezem, 2020-01-25 Cider is an ancient drink that links us to the land where we live in more ways than just the apple that makes it. My goal for this book is to share with you my love of hard cider and the things I have learned so far on my journey as a craft home cider maker. I will give you the details for making different cider styles at home. I will also show you how to better experience cider. I've come to appreciate that cider is part art and part science. It isn't just an alcoholic beverage. It drives us to commune with nature, with our community, and with friends. It

invites us to sit down together and break bread, to share stories, and to appreciate how apples can create a reflection of the land we love with a little art and a little science.

The Cider Revival Jason Wilson, 2019-09-03 "From unraveling the history of the apple to exploring the intricacies of flavor, [Wilson] reveals the love and labor that goes into a timeless beverage." —Bianca Bosker, New York Times—bestselling author of *Cork Dork* Cider is the quintessential American beverage. Drank by early settlers and founding fathers, it was ubiquitous and pervasive, but following Prohibition when orchards were destroyed and neglected, cider all but disappeared. In *The Cider Revival*, Jason Wilson chronicles what is happening now, an extraordinary rebirth that is less than a decade old. Following the seasons through the autumn harvest, winter fermentation, spring bottling, and summer festival and orchard work, Wilson travels around New York and New England, with forays to the Midwest, the West Coast, and Europe. He meets the new heroes of cider: orchardists who are rediscovering long lost apple varieties, cider makers who have the attention to craftsmanship of natural wine makers, and beverage professionals who see cider as poised to explode in popularity. What emerges is a deeply rewarding story, an exploration of cider's identity and future, and its cultural and environmental significance. A blend of history and travelogue, *The Cider Revival* is a toast to a complex drink. "Cider is America's great

forgotten beverage. Jason Wilson's lively, anecdote-filled, passionate paean to what he says should properly be considered 'apple win' will go a long way toward giving this immensely varied and complex libation the recognition and appreciation it deserves." —Colman Andrews, cofounder of Saveur and author of *The British Table*

Making Craft Cider Simon McKie, 2011-04-19 Small cider production is becoming a booming business as apple cider in all its varieties experiences seen a surge of popularity. Across North America, drinkers are enjoying imported ciders such as Magners, Bulmers and Strongbow, alongside national ciders such as Woodchuck and Original Sin. With this popularity also comes a rise in home cider making. *Craft Cider Making* explores all of these aspects of cider making, and much more, in a highly illustrated format. This book takes readers through the history and practicalities of cider making, and introduces the concepts and techniques of craft cider production. It looks at the different styles of cider, and the effect of fruit variety, climate and orchard location on the finished drink. Each step in the process of production is addressed and explained, including terroir, cider apples, scratting, pressing, measuring and adjusting, yeasts, fermentation, clarity, sweetening cider, and recipe/process experimentation. The book concludes with a suggested method for the home cider maker. This is the perfect introduction for anyone considering cider making, and a fascinating explanation of the history and process of real cider production for anyone who enjoys this complex and varied beverage on any level.

Cidermaster of Rio Oscuro Harvey Frauenglass, 2000 The Rio Oscuro begins as snowmelt in the Sangre de Cristo Mountains and makes its way through wandering but determined tributaries, watering pueblos, pastures, fields, and orchards in the chain of narrow valleys that lead to the Rio Grande. In Cidermaster of Rio Oscuro, one of these orchards is the setting for fourteen seasons of growth and harvest and for one man's meditations on the natural cycles of life and death. Harvey Frauenglass, the current steward of this orchard, walks us through his days of incessant, humbling work as he prunes the trees and floods the orchards, presses cider, hauls boxes to the farmers' market, tends geese and chickens, and repairs gates and joists. Almost everything on this farm, he writes, is susceptible to improvement. But as Frauenglass comes to realize, this shamble of property offers, in reality, a kind of salvation.

American Cider Dan Pucci, Craig Cavallo, 2021-03-02 “Not just a thorough guide to the history of apples and cider in this country but also an inspiring survey of the orchardists and cidermakers devoting their lives to sustainable agriculture through apples.”—Alice Waters “Pucci and Cavallo are thorough and enthusiastic chroniclers, who celebrate cider’s pomologists and pioneers with infectious curiosity and passion.”—Bianca Bosker, New York Times bestselling author of *Cork Dork* Cider today runs the gamut from sweet to dry, smooth to funky, made from apples and sometimes joined by other fruits—and even hopped like beer. In *American Cider*, aficionados Dan Pucci and Craig Cavallo give a new wave of consumers the tools to taste, talk about, and choose their ciders, along with stories of the many local heroes saving apple culture and producing new varieties. Like wine made from well-known grapes, ciders differ based on the apples they’re made from and where and how those apples were grown. Combining the tasting tools of wine and beer, the authors illuminate the possibilities of this light, flavorful, naturally gluten-free beverage. And cider is more than just its taste—it’s also historic, as the nation’s first popular alcoholic beverage, made from apples brought across the Atlantic from England. Pucci and Cavallo use a region-by-region approach to illustrate how cider and the apples that make it came to be, from the well-known tale of

Johnny Appleseed—which isn't quite what we thought—to the more surprising effects of industrial development and government policies that benefited white men. *American Cider* is a guide to enjoying cider, but even more so, it is a guide to being part of a community of consumers, farmers, and fermenters making the nation's oldest beverage its newest must-try drink.
