Managing Legal Compliance in the Health Care Industry George B. Moseley III, 2013-09-20 Managing Legal Compliance in the Health Care Industry is a comprehensive text that prepares students for this increasingly critical field in health care administration. In three sections, this unique title first examines all the key laws and regulations that health care organizations must comply with. In section two, it explores in detail the seven essential ingredients for a good compliance program. In the final section, the book explains how the compliance program must be adapted to the special needs of different types of health care organizations. Designed for graduate level students in programs of public health, health administration, and law, the text is filled with highly practical information about the ways that legal violations occur and how good compliance programs function. Key Features: - Examines in detail the current laws and regulations with which all types of health care organizations must comply - Explore the seven essential ingredients for a good compliance program - Looks at compliance programs within twelve different types of health care organizations - References real world cases of fraud and abuse - Includes Study Questions and Learning Experiences in each chapter that are designed to encourage critical thinking

Implementing a Comprehensive Research Compliance Program Aurali Dade, Lori Olafson, Suzan M. DiBella, 2015-07-01 The senior research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment. These administrators are tasked with a special challenge: ensuring that their institutions conduct safe, ethical, and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals. These competing responsibilities can make the role of the research administrator complex; however, those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field. Thus, the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs. Previous volumes on these topics have focused primarily on educating research faculty, staff, and students. An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator; yet, the books have limited guidance intended for the senior research administrators themselves. This handbook is designed, therefore, to serve as a detailed program implementation manual for these administrators, who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those

conducting research, as well as upper administration and others interested in safe, ethical, and compliant research.

Health Care Fraud and Abuse Aspen Health Law Center,1998 Stepped-up efforts to ferret out health care fraud have put every provider on the alert. The HHS, DOJ, state Medicaid Fraud Control Units, even the FBI is on the case -- and providers are in the hot seat! in this timely volume, you'll learn about the types of provider activities that fall under federal fraud and abuse prohibitions as defined in the Medicaid statute and Stark legislation. And you'll discover what goes into an effective corporate compliance program. With a growing number of restrictions, it's critical to know how you can and cannot conduct business and structure your relationships -- and what the consequences will be if you don't comply.

Program Evaluation Susan P. Giancola,2020-01-03 Program Evaluation: Embedding Evaluation into Program Design and Development provides an in-depth examination of the foundations, methods, and relevant issues in the field of evaluation. With an emphasis on an embedded approach, where evaluation is an explicit part of a program that leads to the refinement of the program, students will learn how to conduct effective evaluations that foster continual improvement and enable data-based decision making. This text provides students with both the theoretical understanding and the practical tools to conduct effective evaluations while being rigorous enough for experienced evaluators looking to expand their approach to evaluation.

Mobilizing for Evidence-Based Character Education Linda McKay,2009-09 Many educators believe that implementing character education (CE) in their schools helps students develop ethically, socially and academically. CE embraces all aspects of how schools, related social institutions and parents can support the positive character development of children and adults. This evaluation guide is a resource primarily for project directors who are federal grantees embarking on an evaluation of a CE intervention, although it contains useful info. that can benefit other education administrators who also are providing these interventions. The guide offers strategies for working with external evaluators and key stakeholders in planning and implementing a scientifically sound evaluation. Illustrations.

Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
