

Policy Making In The European Union

Bremberg, Niklas, Danielson, August, Hedling, Elsa, Michalski, Anna

Policy-making in the European Union Helen Wallace, Mark A. Pollack, Alasdair R. Young, 2015 The policies of the European Union profoundly affect the lives of people in Europe and around the world. The new edition of this highly successful textbook outlines how and why such decisions are made, as well as the key challenges faced by policy-makers in the current political and economic climate.

Policies and Policy Processes of the European Union Laurie Buonanno, Neill Nugent, 2020-11-28 The dynamic and complex system of European Union policymaking is analysed in this new edition of a much-praised textbook. It offers the most integrated understanding of EU policy available. Major approaches to policymaking – including intergovernmentalism, neofunctionalism, supranationalism and critical theory – are presented and supplemented with the authors' own theoretical model, federal integration, to create a comprehensive evaluation of the EU's interests and actors in key policy domains. The text covers the EU's main policy areas – including those on the single market, Economic and Monetary Union, foreign policy, migration and border control, social and regional policies, and the budget – locating them in this wider theoretical framework. As such, it is the key introduction to the subject for students of European Politics at undergraduate and postgraduate levels. New to this Edition: - Each chapter rewritten, many extensively, throughout - New chapters on migration and border control, competition policy, and social and cohesion policies. - New illustrative material and many new examples - Each chapter now includes a Guide to Further Reading

European Union Jeremy Richardson, Sonia Mazey, 2015-02 European Union: Power and Policy-Making 4th edition offers a comprehensive and accessible introduction to the European Union. Aimed at advanced undergraduate and postgraduate students, its primary goal is to advance understanding of the European integration process in terms of the EU as a maturing and ongoing policy system. Written by a distinguished group of internationally recognised researchers, this new edition has been significantly improved to make it even more clear and concise. With an aim to stimulating students' interest, this book addresses some of the more contentious areas whilst also continuing to cover the vital elements of EU courses including: Theoretical and historical perspectives The roles of the key institutions in the processing of policy issues Different channels of representation The EU as a supranational 'state' European Union: Power and Policy-Making is a key textbook for students of the European Union and contemporary European politics--

Policy-making in the European Union Helen S. Wallace, William Wallace, 1996 This is a fully revised edition of a well-established text for students. It offers an invaluable and up-to-date interpretation of the European policy process. Helen Wallace and William Wallace have assembled a team of internationally-renowned authors to present fourteen case studies -- ranging from analyses of the CAP and environmental policy, to the politics of Economic and Monetary Union and the new World Trade Organisation. Helen Wallace also provides, in the two opening chapters, an introduction and overview of European politics, policy, and institutions. In concluding the volume, William Wallace reflects on the future for the EU as it faces calls for ever closer political integration. Policy-Making in the European Union provides the student with a timely and provocative insight into European integration in a period of critical change.

Policy-Making in the European Union Laura Cram, 2005-06-28 Laura Cram takes a fresh view at attempts to conceptualize the process of European integration. Her book explores the impact of the day to day work of policy maker, interest groups and bureaucrats in influencing the environment in which European Treaty formulation and ratification are taken. She sheds new light on the wide range of policy areas in which institutions such as the Commission of the European Union and the European Court of Justice have succeeded in expanding the scope of EU competence despite national government opposition.

Differential Europe Adrienne Windhoff-Héritier, 2001 Heritier, Kerwer, Knill, Lehmkuhl (all with the Max Planck Project Group, Common Goods: Law, Politics, and Economics), Teutsch (European Union Department of the German Federal Ministry of Labour and Social Affairs), and Douillet (Ecole Normale Supérieure de Cachan) combine efforts in this study to develop a theoretical and conceptual framework for studying the impact of European policies on member states. The authors argue that the influence of EU policies on each member state depends on each state's preexisting policies and institutional capacity to change. The study focuses on transport policy, presenting case studies from Britain, France, Germany, Italy and the Netherlands to demonstrate differences in the impacts of EU policies. The text concludes with a comparison of the differences in responses of member states to identical European policy demands and similar external and internal conditions. c. Book News Inc.

Policy Making in the European Union - Policy Making and Implementation Heiko Bubholz, 2002-07-19 Seminar paper from the year 2002 in the subject Politics - Topic: European Union, grade: 1,0 (A), Jagiellonian University in Krakow (Centre for European Studies), course: EU Law and Institutions, language: English, abstract: Now, in January 2002, a visible step in European integration has been accomplished. With the introduction of the European €-currency about 296,8 millions citizen1 of the European Union (EU) will hold the new symbols of unity of Europe's peoples in their hands. What began with an attempt of reconciliation and co-operation via the ECSC in 1952 has now developed towards a so far unprecedented transfer of sovereign rights and competence from nation states to a supranational/intergovernmental organisation. However,

throughout the EU prevail doubts concerning the deeper mechanism of policy making. Despite certain inscrutability and the mysterious nature of decision making there are demands for more democracy in the Union. On the other side it may be assumed that most of the European citizen do not really take notice of high and low politics decided upon in the European institutions. Aim of this paper shall therefor be a closer elaboration of the policy making process in the European Union, the enforcement of decisions on European and national level, and finally influences or interdependencies from outside the formal institution, interfering in Europe's policy and polity. Hence, the results of the Nice IGC are not ratified yet – which might not be assumed soon – I focus on the binding regulations of the Amsterdam Treaty². After a short description of the – as I would prefer to name it – macro level (Commission, Council, Parliament, Courts), where provisions are concluded, the implementation of this policies and decisions on the micro/national level shall be explained thereafter. Finally outside impetus (lobbying, national interests, etc.) on the decision and interpretation process shall be elaborated in a limited scope as well. [...]

The Politics of the European Union Herman Lelieveldt, Sebastiaan Princen, 2023-04-20 The European Union is a key player in determining policies and politics in Europe, and yet understanding how it works remains a challenge. The Politics of the European Union introduces students to its functioning by showing the similarities and differences between the EU and national political systems. Fully revised and updated in its third edition, this introductory textbook uses the tools of comparative politics to explore the history, theories, institutions, key actors, politics and policy-making of the EU. This comparative approach enables students to apply their knowledge of domestic politics and broader debates in political science to better understand the EU. Numerous real-world examples guide students through the textbook, and chapter briefings, fact files and controversy boxes highlight the important and controversial issues in EU politics. A companion website features free 'Navigating the EU' exercises to guide students in their analysis of EU policy-making.

Constructing a Policy-Making State? Jeremy Richardson, 2012-09-20 Constructing a Policy-Making State? sets out to examine the processes by which Europeanization takes place. Europeanization is defined as the process by which the key decisions about public policies are gradually transferred to the European level (or for new policy areas, emerge at the European level). This is in contrast to definitions of Europeanization which focus on the adaption of member states to European public policies. Thus, the main focus is whether a European Union 'policy-making state' is being created via changes in the distribution of power between member states and the European level institutions over time. In addition to several overview chapters (such as on agenda setting in the EU), there are twelve sectoral studies which analyse the differing trajectories and outcomes of the Europeanization process and the extent to which the European Union can make 'authoritative allocations'. The case studies have been selected in order to illustrate the degree of cross-sectoral variation in the process of Europeanization, from sectors which have yet to see very much Europeanization, such as health, to sectors

such as competition policy which are almost fully Europeanized. The book is consciously multi-theoretic in its approach, drawing on a range of theories and concepts, from theories of European integration, to theories of public policy processes.

Policy Making in the European Union Helen S. Wallace,William Wallace,1996

Making Policy in Europe Svein S Andersen,Kjell A Eliassen,2001-01-26 This Second Edition of Making Policy in Europe is fully revised and expanded to provide the most up-to-date introduction to the study of policymaking in the European Union (EU). The first part of the book introduces the different perspectives to study of the EU as a political system, and provides a framework for the study of the main actors and institutions in the decision-making process from transnational lobbying within Brussels to the implementation of EU law in national member states. Part two introduces each of the main sectoral policy areas. The common market is introduced and reviewed before students are provided with detailed studies of policies and policy-making in telecommunications, the environment, energy, education, immigration, and policing. In each case the complex interaction between different interests and actors at different levels in the EU apparatus is richly illustrated and the future prospects for further integration fully examined. The final part of the book looks at the future economic and political structure of the EU and the direction of contemporary studies of the EU and European integration. A completely new chapter reviews European monetary union, another looks at the important enlargement question, and, finally, the editors review the wider implications for Europe and the EU political system. This book will be essential reading for another generation of students of the EU, European public policy and European integration. In each case the complex interaction between interests and actors at different levels in the EU apparatus is richly illustrated and the future prospects for further integration are examined.

Decision-Making in the European Union John Peterson,Elizabeth Bomberg,1999-05-25 Based on exhaustive research, this book explains how the European Union makes decisions in seven major policy sectors. Written in a clear, user-friendly style, it brings the EU alive for a student and non-specialist audience. The book's central themes are that informal norms often matter more than formal rules, agency often matters more than structure, and abrupt change often punctuates deadlock. It offers a theoretically-based introduction to the lively, humorous and fascinating politics of a unique experiment in modern governance.

The Everyday Making of EU Foreign and Security Policy Bremberg, Niklas,Danielson, August,Hedling, Elsa,Michalski, Anna,2022-02-18 This is an open access title available under the terms of a [CC BY-NC-ND 4.0] License. It is free to read, download and share on Elgaronline.com. This cutting-edge book explores the practices and socialization of the everyday foreign policy making in the European Union (EU), focusing on the individuals who shape and implement the Common Foreign and Security Policy despite a growing dissension among member states.

Telecommunications Policy-making in the European Union Joseph W. Goodman,2006-01-01 This book offers a good

study of the development of telecommunications policy by the EU. . . Great value to those interested in understanding both European telecommunications policy and more generally in how policy-making operates in the EU. Mark Thatcher, *West European Politics* . . . the book provides an interesting perspective on the evolution of nature of telecommunications policy-making within the EU. As a consequence, the book should be of interest to telecommunications and politics/government researchers alike, Jason Whalley, *Communications Booknotes Quarterly* This well-written book deals with the emergence and shaping of telecommunications policy in Europe, with a particular focus on the time period of 1987-1998. . . This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail. The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way, without falling into the trap of admiring critical personalities and key actors. . . The author has written an important and useful book, which invites the research community to further explore the evolution of European telecommunications policy. Erik Bohlin, *Communications & Strategies* Examining the emergence of a European Union telecommunications policy, Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others. He provides a history of the key actors in the policy-making process from the first attempts by the national postal, telegraph, and telecommunication administrations to coordinate their telecommunications policies in the 1950s, to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003. The analytical framework employed by the author draws upon new institutionalism and actor-based approaches, providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy-making. The focus of his analysis is on the European Commission's two-pronged strategy of liberalisation and harmonisation, which began in the late 1980s and culminated in an important milestone on January 1st 1998, when the EU Member States fully opened their telecommunications markets to competition. He concludes that a synthetic approach, which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis, is useful even necessary in understanding and explaining the many dimensions of EU policy-making. This authoritative study will be of interest to all those in the telecommunications industry including attorneys, consultants, and lobbyists who would like to know how the EU's policy developed. It will appeal, more generally, to political scientists and scholars of European history and politics.

New Challenges to the European Union Stelios Stavridis, 1997 Twenty-five experts, primarily based in the UK or Brussels, address fundamental questions about the evolution of policies and policy-making in the European Union, including how the processes and institutions are being reformed; how the Single Market is being completed and the plan to create an Economic and Monetary Union is being implemented; and whether the main policies of the EU face major modifications in the context of a possible enlargement to 27 or more members. The Language(s) of Politics Nils Ringe, 2022-01-19 Multilingualism is an ever-present feature in political contexts around the world, including multilingual states and international organizations. Increasingly, consequential political decisions are negotiated between politicians who do not share a common native language. Nils Ringe uses the European Union to investigate how politicians' reliance on shared foreign languages and translation services affects politics and policy-making. Ringe's research illustrates how multilingualism is an inherent and consequential feature of EU politics—that it depoliticizes policy-making by reducing its political nature and potential for conflict. An atmosphere with both foreign language use and a reliance on translation leads to communication that is simple, utilitarian, neutralized, and involves commonly shared phrases and expressions. Policymakers tend to disregard politically charged language and they are constrained in their ability to use vague or ambiguous language to gloss over disagreements by the need for consistency across languages.

Participation and Policy-making in the European Union Helen S. Wallace, Alasdair R. Young, 2023 Based on a range of case studies of regulatory and industrial policies, this study shows that the European policy process provides access points for a wide variety of interests, and that interplay between these influences the policy process itself.

The European Union, the World Bank and the Policymaking of Aid Eugenia Baroncelli, 2019-01-03 Based on the experience of the author, an IPE scholar and former trade policy consultant at the World Bank (WB), the book offers an in-depth exploration of the EU-WB relations, conceptualized as hybrid delegation. Coupling cross-time analyses of their interaction in the regions of the Middle East and North Africa, Europe and Central Asia and Sub-Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the 'voice and participation reform' of 2008-2010, the book advances an innovative theoretical framework to assess the EU-WB joint institutional and field policy performances. Augmented PA models of delegation, role theory and performance analyses are engaged, and selectively recombined, to investigate the nature, evolution and impact of the interactions of the two organizations, both in their everyday and constituent politics. Hybrid delegation-in-motion is reconstructed, against the background of post-Washington Consensus and post-Lisbon EU, to unveil the changing division of labour between the two largest development multilaterals of the new global context. The book will be of interest to scholars, students and practitioners in European Politics, Development, International Relations, International Political Economy and Global Economic Governance.

Analyzing the European Union Policy Process Esther Versluis, Mendeltje van Keulen, Paul Stephenson, 2010-10-15 Readers are provided with a practical insight into how to analyze policies and policy-making in the EU. Using case studies to deepen readers' understanding, this book examines the various stages of the policy process - from the moment the issue reaches the

agenda through to drafting, implementation and evaluation.

European Governance G.P.E. Walzenbach, 2017-03-02 This collection provides a balanced evaluation of multi-level governance. Written by international experts of policy-making in the European Union, each contribution builds on common conceptual definitions, critically debating their adaptation to policy-specific contexts and investigating their usefulness for conducting empirical research. This engaging text uses case studies to identify the specific changes that have occurred in power relations across different levels of the EU system. With varying emphasis on state and non-state actors, on country comparisons and international processes, the reader is invited to join a fruitful dialogue among the contributors about the symbiotic relationship of multi-level analysis with other conceptual innovations such as transnational regulation, network formation or market internationalization. This book confronts sophisticated theoretical reasoning with the actual realities of policy-making and is therefore essential reading for all those interested in the risks and opportunities of a comparative-interdisciplinary approach to European governance.
