

Policy Making In The European Union

Esther Versluis, Mendeltje van Keulen, Paul Stephenson

Policy-making in the European Union Helen Wallace, Mark A. Pollack, Alasdair R. Young, 2015 The policies of the European Union profoundly affect the lives of people in Europe and around the world. The new edition of this highly successful textbook outlines how and why such decisions are made, as well as the key challenges faced by policy-makers in the current political and economic climate.

Policies and Policy Processes of the European Union Laurie Buonanno, Neill Nugent, 2020-11-28 The dynamic and complex system of European Union policymaking is analysed in this new edition of a much-praised textbook. It offers the most integrated understanding of EU policy available. Major approaches to policymaking – including intergovernmentalism, neofunctionalism, supranationalism and critical theory – are presented and supplemented with the authors' own theoretical model, federal integration, to create a comprehensive evaluation of the EU's interests and actors in key policy domains. The text covers the EU's main policy areas – including those on the single market, Economic and Monetary Union, foreign policy, migration and border control, social and regional policies, and the budget – locating them in this wider theoretical framework. As such, it is the key introduction to the subject for students of European Politics at undergraduate and postgraduate levels. New to this Edition: - Each chapter rewritten, many extensively, throughout - New chapters on migration and border control, competition policy, and social and cohesion policies. - New illustrative material and many new examples - Each chapter now includes a Guide to Further Reading Accompanying online resources for this title can be found at bloomsburyonlineresources.com/policies-and-policy-processes-of-the-european-union. These resources are designed to support teaching and learning when using this textbook and are available at no extra cost

Policy-making in the European Union Helen S. Wallace, William Wallace, 1996 This is a fully revised edition of a well-established text for students. It offers an invaluable and up-to-date interpretation of the European policy process. Helen Wallace and William Wallace have assembled a team of internationally-renowned authors to present fourteen case studies -- ranging from analyses of the CAP and environmental policy, to the politics of Economic and Monetary Union and the new World Trade Organisation. Helen Wallace also provides, in the two opening chapters, an introduction and overview of European politics, policy, and institutions. In concluding the volume, William Wallace reflects on the future for the EU as it faces calls for ever closer political integration. Policy-Making in the European Union provides the student with a timely and

provocative insight into European integration in a period of critical change.

European Union Jeremy Richardson, Sonia Mazey, 2015-02 European Union: Power and Policy-Making 4th edition offers a comprehensive and accessible introduction to the European Union. Aimed at advanced undergraduate and postgraduate students, its primary goal is to advance understanding of the European integration process in terms of the EU as a maturing and ongoing policy system. Written by a distinguished group of internationally recognised researchers, this new edition has been significantly improved to make it even more clear and concise. With an aim to stimulating students' interest, this book addresses some of the more contentious areas whilst also continuing to cover the vital elements of EU courses including: Theoretical and historical perspectives The roles of the key institutions in the processing of policy issues Different channels of representation The EU as a supranational 'state' European Union: Power and Policy-Making is a key textbook for students of the European Union and contemporary European politics--

Policy-Making in the European Union Laura Cram, 2005-06-28 Laura Cram takes a fresh view at attempts to conceptualize the process of European integration. Her book explores the impact of the day to day work of policy maker, interest groups and bureaucrats in influencing the environment in which European Treaty formulation and ratification are taken. She sheds new light on the wide range of policy areas in which institutions such as the Commission of the European Union and the European Court of Justice have succeeded in expanding the scope of EU competence despite national government opposition.

Differential Europe Adrienne Windhoff-Héritier, 2001 Heritier, Kerwer, Knill, Lehmkuhl (all with the Max Planck Project Group, Common Goods: Law, Politics, and Economics), Teutsch (European Union Department of the German Federal Ministry of Labour and Social Affairs), and Douillet (Ecole Normale Supérieure de Cachan) combine efforts in this study to develop a theoretical and conceptual framework for studying the impact of European policies on member states. The authors argue that the influence of EU policies on each member state depends on each state's preexisting policies and institutional capacity to change. The study focuses on transport policy, presenting case studies from Britain, France, Germany, Italy and the Netherlands to demonstrate differences in the impacts of EU policies. The text concludes with a comparison of the differences in responses of member states to identical European policy demands and similar external and internal conditions.

Decision-Making in the European Union John Peterson, Elizabeth Bomberg, 1999-05-25 Based on exhaustive research, this book explains how the European Union makes decisions in seven major policy sectors. Written in a clear, user-friendly style, it brings the EU alive for a student and non-specialist audience. The book's central themes are that informal norms often matter more than formal rules, agency often matters more than structure, and abrupt change often punctuates deadlock. It offers a theoretically-based introduction to the lively, humorous and fascinating politics of a unique experiment

in modern governance.

The Politics of the European Union Herman Lelieveldt, Sebastiaan Princen, 2023-04-20 The European Union is a key player in determining policies and politics in Europe, and yet understanding how it works remains a challenge. The Politics of the European Union introduces students to its functioning by showing the similarities and differences between the EU and national political systems. Fully revised and updated in its third edition, this introductory textbook uses the tools of comparative politics to explore the history, theories, institutions, key actors, politics and policy-making of the EU. This comparative approach enables students to apply their knowledge of domestic politics and broader debates in political science to better understand the EU. Numerous real-world examples guide students through the textbook, and chapter briefings, fact files and controversy boxes highlight the important and controversial issues in EU politics. A companion website features free 'Navigating the EU' exercises to guide students in their analysis of EU policy-making.

Analyzing the European Union Policy Process Esther Versluis, Mendeltje van Keulen, Paul Stephenson, 2010-10-15 Readers are provided with a practical insight into how to analyze policies and policy-making in the EU. Using case studies to deepen readers' understanding, this book examines the various stages of the policy process - from the moment the issue reaches the agenda through to drafting, implementation and evaluation.

Policy Making in the European Union - Policy Making and Implementation Heiko Bubholz, 2002-07-19 Seminar paper from the year 2002 in the subject Politics - Topic: European Union, grade: 1,0 (A), Jagiellonian University in Krakow (Centre for European Studies), course: EU Law and Institutions, language: English, abstract: Now, in January 2002, a visible step in European integration has been accomplished. With the introduction of the European €-currency about 296,8 millions citizen1 of the European Union (EU) will hold the new symbols of unity of Europe's peoples in their hands. What began with an attempt of reconciliation and co-operation via the ECSC in 1952 has now developed towards a so far unprecedented transfer of sovereign rights and competence from nation states to a supranational/intergovernmental organisation. However, throughout the EU prevail doubts concerning the deeper mechanism of policy making. Despite certain inscrutability and the mysterious nature of decision making there are demands for more democracy in the Union. On the other side it may be assumed that most of the European citizen do not really take notice of high and low politics decided upon in the European institutions. Aim of this paper shall therefor be a closer elaboration of the policy making process in the European Union, the enforcement of decisions on European and national level, and finally influences or interdependencies from outside the formal institution, interfering in Europe's policy and polity. Hence, the results of the Nice IGC are not ratified yet - which might not be assumed soon - I focus on the binding regulations of the Amsterdam Treaty2. After a short description of the - as I would prefer to name it - macro level (Commission, Council, Parliament, Courts), where provisions are concluded, the implementation of this policies and decisions on the micro/national level shall be explained thereafter. Finally outside

impetus (lobbying, national interests, etc.) on the decision and interpretation process shall be elaborated in a limited scope as well. [...]

Constructing a Policy-Making State? Jeremy Richardson, 2012-09-20 *Constructing a Policy-Making State?* sets out to examine the processes by which Europeanization takes place. Europeanization is defined as the process by which the key decisions about public policies are gradually transferred to the European level (or for new policy areas, emerge at the European level). This is in contrast to definitions of Europeanization which focus on the adaptation of member states to European public policies. Thus, the main focus is whether a European Union 'policy-making state' is being created via changes in the distribution of power between member states and the European level institutions over time. In addition to several overview chapters (such as on agenda setting in the EU), there are twelve sectoral studies which analyse the differing trajectories and outcomes of the Europeanization process and the extent to which the European Union can make 'authoritative allocations'. The case studies have been selected in order to illustrate the degree of cross-sectoral variation in the process of Europeanization, from sectors which have yet to see very much Europeanization, such as health, to sectors such as competition policy which are almost fully Europeanized. The book is consciously multi-theoretic in its approach, drawing on a range of theories and concepts, from theories of European integration, to theories of public policy processes.

The Political Process in the European Union: Decision Making Procedures and Implementation of Policy Harald Löberbauer, 2006-07-28 Scientific Essay from the year 2005 in the subject Politics - Topic: European Union, grade: 2, Diplomatic Academy of Vienna - School of International Studies, course: The political process of the EU: decision-making procedures, language: English, abstract: Answers two major questions: 1. To what extent can one say that the Council and the EP are on an "equal footing" in the legislative process? 2. The member state level and the European (EU) level do not work separately but constantly "overlap" in the EU decision-making process (for example by way of committees). Do you agree and how could one practically illustrate this trend of "interaction" between the different levels?

Policy Making in the European Union Helen S. Wallace, William Wallace, 1996

Making Policy in Europe Svein S Andersen, Kjell A Eliassen, 2001-01-26 This Second Edition of *Making Policy in Europe* is fully revised and expanded to provide the most up-to-date introduction to the study of policymaking in the European Union (EU). The first part of the book introduces the different perspectives to study of the EU as a political system, and provides a framework for the study of the main actors and institutions in the decision-making process from transnational lobbying within Brussels to the implementation of EU law in national member states. Part two introduces each of the main sectoral policy areas. The common market is introduced and reviewed before students are provided with detailed studies of policies and policy-making in telecommunications, the environment, energy, education, immigration, and policing. In each case the complex interaction between different interests and actors at different levels in the EU apparatus is richly illustrated and the

future prospects for further integration fully examined. The final part of the book looks at the future economic and political structure of the EU and the direction of contemporary studies of the EU and European integration. A completely new chapter reviews European monetary union, another looks at the important enlargement question, and, finally, the editors review the wider implications for Europe and the EU political system. This book will be essential reading for another generation of students of the EU, European public policy and European integration. In each case the complex interaction between interests and actors at different levels in the EU apparatus is richly illustrated and the future prospects for further integration are examined.

New Challenges to the European Union Stelios Stavridis, 1997 Twenty-five experts, primarily based in the UK or Brussels, address fundamental questions about the evolution of policies and policy-making in the European Union, including how the processes and institutions are being reformed; how the Single Market is being completed and the plan to create an Economic and Monetary Union is being implemented; and whether the main policies of the EU face major modifications in the context of a possible enlargement to 27 or more members. Telecommunications Policy-making in the European Union Joseph W. Goodman, 2006-01-01 This book offers a good study of the development of telecommunications policy by the EU. . . Great value to those interested in understanding both European telecommunications policy and more generally in how policy-making operates in the EU. Mark Thatcher, *West European Politics* . . . the book provides an interesting perspective on the evolution of nature of telecommunications policy-making within the EU. As a consequence, the book should be of interest to telecommunications and politics/government researchers alike, Jason Whalley, *Communications Booknotes Quarterly* This well-written book deals with the emergence and shaping of telecommunications policy in Europe, with a particular focus on the time period of 1987-1998. . . This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail. The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way, without falling into the trap of admiring critical personalities and key actors. . . The author has written an important and useful book, which invites the research community to further explore the evolution of European telecommunications policy. Erik Bohlin, *Communications & Strategies* Examining the emergence of a European Union telecommunications policy, Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others. He provides a history of the key actors in the policy-making process from the first attempts by the national postal, telegraph, and telecommunication administrations to coordinate their telecommunications policies in the 1950s, to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003. The analytical framework employed by the

author draws upon new institutionalism and actor-based approaches, providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy-making. The focus of his analysis is on the European Commission's two-pronged strategy of liberalisation and harmonisation, which began in the late 1980s and culminated in an important milestone on January 1st 1998, when the EU Member States fully opened their telecommunications markets to competition. He concludes that a synthetic approach, which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis, is useful even necessary in understanding and explaining the many dimensions of EU policy-making. This authoritative study will be of interest to all those in the telecommunications industry including attorneys, consultants, and lobbyists who would like to know how the EU's policy developed. It will appeal, more generally, to political scientists and scholars of European history and politics.

Decision making in the EU before and after the Lisbon Treaty Madeleine Hosli, Amie Kreppel, Běla Plechanová, Amy Verdun, 2017-10-02 Decision-making in the European Union before and after the Lisbon Treaty aims to assess what the changes the Treaty of Lisbon envisaged and whether these ambitions have materialised since the Treaty entered into force. It offers analyses of the past, as well as what might be the future (because some provisions will only enter into effect in the years to come). To what extent has the current decision-making process been able to address the shortcomings and challenges of the past? What has been the impact of aspects of the Lisbon Treaty that clarified pre-existing norms and structures, in some cases formalizing them, rather than introducing new changes? The authors in this book look at the interaction between formal rules and informal practices seeking to point to the interaction between the two. They find that informal practices to date typically still dominate formal rules. This book was published as a special issue of *West European Politics*.

The Language(s) of Politics Nils Ringe, 2022-01-19 Multilingualism is an ever-present feature in political contexts around the world, including multilingual states and international organizations. Increasingly, consequential political decisions are negotiated between politicians who do not share a common native language. Nils Ringe uses the European Union to investigate how politicians' reliance on shared foreign languages and translation services affects politics and policy-making. Ringe's research illustrates how multilingualism is an inherent and consequential feature of EU politics—that it depoliticizes policy-making by reducing its political nature and potential for conflict. An atmosphere with both foreign language use and a reliance on translation leads to communication that is simple, utilitarian, neutralized, and involves commonly shared phrases and expressions. Policymakers tend to disregard politically charged language and they are constrained in their ability to use vague or ambiguous language to gloss over disagreements by the need for consistency across languages.

EU Policies: an Overview Rudolf W. Strohmeier, Ingrid Habets, 2013 PDF downloadable for free from: <http://martenscentre.eu/publications/eu-policies-overview-decision-making-implementation> The European Union affects our

daily lives. National governments implement regulations and laws which have been made at the EU level. The EU removes barriers between Member States, and we all profit from the freedom of movement of people and services in the EU. However, it is not always clear how these decisions are made, what policies are in place or the consequences these have for citizens and the EU as a whole. With much ongoing debate about reforming Europe, it is now more important than ever to know more about EU policies. This book contains 16 chapters on various EU policies, from financial topics to justice issues and foreign policy. It gives a broad and in-depth overview of the EU's and Member States' efforts to work together on issues that concern all of us, across the borders of the Member States. It provides information on the state of play and offers a glimpse of where we are headed. The book is intended for anyone who would like to learn more about EU policies, but especially for policymakers who wish to gain deeper knowledge of specific areas of EU policy.

Politics of European Union Regional Policy Ian Bache, 1998-12-01 This book provides an over-view of the key developments in the politics of European Union regional policy from the creation of the EEC to the present day. The discussion of 'who decides what and to what effect' in relation to regional policy is part of the contemporary academic debate about the nature of politics and policy-making in the EU. Bache argues that no single theory can explain the complex politics of EU regional policy-making. In particular, current theories pay insufficient attention to the importance of implementation in shaping policy outcomes. The book concludes that the application of different analytical tools at different stages of policy-making provides the fullest picture of the politics of EU regional policy. This title is published in conjunction with UACES, the University Association for Contemporary European Studies. UACES web site can be found at www.uaces.org
