World History In Minutes Tat Wood, Dorothy Ali, 2015-08-04 What happened to the Roman Empire? Why was the Magna Carta so important? What led to the First World War? Why did the USSR collapse? Contents include: Neanderthals, Babylonians, Attila the Hun, Abyssinian Empire, Magna Carta, Black Death, Inca, Henry VIII Reformation, Ulster Plantations, Rousseau

No-Nonsense Guide to World History, 3rd Edition Chris Brazier, 2011-09-01 Who was the first black queen? How much do you know about China's history? Most people's knowledge of world history is hazy and incomplete at best. This updated No-Nonsense Guide gives a full picture, revealing the hidden histories and communities left out of conventional textbooks from the civilizations of Africa, Asia and Latin America to the history of women. This updated and revised edition of one of the best-selling No-Nonsense Guides includes a new chapter from the perspective of the end of the first decade of the 21st century and includes material on the financial crisis and the world response to climate change. A perfect read for someone who wants to embrace the whole of history, rather than disconnected dynasties and events all in one slim volume.

The Super Summary of World History Alan Dale Daniel,2008 The Super Summary of World History Revised is a new and very compact history of the world emphasizing western culture and political processes as of 2010. Mr. Daniel has completely reviewed and rewritten major sections of his original work, The Super Summary of World History, and published his updated work as the Super Summary of World History Revised. The Super Summary is for the thinking person. This new history raises exciting questions and puts events into new perspectives to stimulate real thinking about history rather than accepting that the past as set in stone. History isn't just names and dates, but a range of decisions and actions that often turn on the smallest circumstance. The Super Summary analyzes a few events in depth but most are put into their historical framework so the reader discern where and how all of this action escorts us to the present day. If history seems dull, pick up The Super Summary to discover that Western History is alive with controversy and consequence. The book has 612 pages, over 83 Figures most of which are maps - a detailed Table of Contents, a time line of essential events, a list of important on-line sources, an extensive index, and 391 footnotes. At the end of key chapters is a list of reading and on-line sources to help the reader expand their knowledge of history Plus a new Let Us Learn section detailing what history can teach us. Throughout the text, critical names are in bold, and extremely important events are in bold and italic print.

A History of the World in 100 Objects Neil MacGregor,2011-10-06 This book takes a dramatically original approach to the history of humanity, using objects which previous civilisations have left behind them, often accidentally, as prisms through which we can explore past worlds and the lives of the men and women who lived in them. The book's range is enormous. It begins with one of the earliest surviving objects made by human hands, a chopping tool from the Olduvai gorge in Africa, and ends with an object from the 21st century which represents the world we live in today. Neil MacGregor's aim is not simply to describe these remarkable things, but to show us their significance - how a stone pillar tells us about a great Indian emperor preaching tolerance to his people, how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea-set tells us about the impact of empire. Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well-informed guide. Seen through this lens, history is a kaleidoscope - shifting, interconnected, constantly surprising, and shaping our world today in ways that most of us have never imagined. An intellectual and visual feast, it is one of the most engrossing and unusual history books published in years.
