On Animals: Systematic Theology David L. Clough, 2012-02-02 The first book-length study of the place of animals in systematic theology.

On Animals David L. Clough, 2018-12-27 This book presents an authoritative and comprehensive survey of human practice in relation to other animals, together with a Christian ethical analysis building on the theological account of animals which David Clough developed in *On Animals Volume I: Systematic Theology* (2012). It argues that a Christian understanding of other animals has radical implications for their treatment by humans, with the human use and abuse of non-human animals for food the most urgent immediate priority. Following an introduction examining the task of theological ethics in relation to non-human animals and the way it relates to other accounts of animal ethics, this book surveys and assesses the use humans make of other animals for food, for clothing, for labour, as research subjects, for sport and entertainment, as pets or companions, and human impacts on wild animals. The result is both a state-of-the-art account of what humans are doing to other animals, and a persuasive argument that Christians in particular have strong faith-based reasons to acknowledge the significance of the issues raised and change their practice in response.

Animal Theology Andrew Linzey, 1995 Animal rights is animal theology. The author argues that historical theology, creatively defined, must reject humanocentricity. He questions the assumption that if theology is to speak on this issue, 'it must only do so on the side of the oppressors.' His theological query investigates not only the abstractions of theory, but also the realities of hunting, animal experimentation, and genetic engineering. He is an important, pioneering, Christian voice speaking for those who cannot speak for themselves.

Why Animal Suffering Matters Andrew Linzey, 2013-11-01 How we treat animals arouses strong emotions. Many people are repulsed by photographs of cruelty to animals and respond passionately to how we make animals suffer for food, commerce, and sport. But is this, as some argue, a purely emotional issue? Are there really no rational grounds for opposing our current treatment of animals? In *Why Animal Suffering Matters*, Andrew Linzey argues that when analyzed impartially the rational case for extending moral solicitude to all sentient beings is much stronger than many suppose. Indeed, Linzey shows that many of the justifications for inflicting animal suffering in fact provide grounds for protecting them. Because animals, the argument goes, lack reason or souls or language, harming them is not an offense. Linzey suggests that just the opposite is true, that the inability of animals to give or withhold consent, their inability to represent their interests, their moral innocence, and their relative defenselessness all compel us not to harm them. Andrew Linzey further shows that the arguments in favor of three controversial practices--hunting with dogs, fur farming, and commercial sealing--cannot withstand rational critique. He considers the economic, legal, and political issues surrounding each of these practices, appealing not to our emotions but to our reason, and shows that they are rationally unsupportable and morally repugnant. In this superbly argued and deeply engaging book, Linzey pioneers a new theory about why animal suffering matters, maintaining that sentient animals, like infants and young children, should be accorded a special moral status.

Animals in Tillich's Philosophical Theology Abbey-Anne Smith, 2017-10-02 This book explores how Paul Tillich's systematic theology, focusing on the concepts of being and reason can benefit nonhuman animals, while also analysing how taking proper account of nonhuman animals can prove immensely beneficial. The author first explains the body of Tillich's

system, examining reason and revelation, life and the spirit, and history and the kingdom of God. The second section undertakes a critical analysis of Tillichian concepts and their adequacy in relation to nonhuman animals, addressing topics such as Tillich's concept of 'technical reason' and the multidimensional unity of life. The author concludes by discussing the positive concepts in Tillich's systematic theology with respect to nonhuman animals and creation, including the concept of universal salvation and Tillich's interpretation of nonhuman animals and the Fall in Genesis.

Animals on the Agenda Andrew Linzey, Dorothy Yamamoto, 1998 This encyclopaedic volume is the most comprehensive collection of original studies on animals and theology every published. With contributors from both sides of the Atlantic, it tackles many apparently simple issues which raise fundamental questions about theology and how it is done.

Animal Rites Andrew Linzey, 2015-06-23 Christians believe that the logos is the source of all life, yet Christian worship remains unashamedly human-centric. The world of creation, and animals in particular, is almost invisible in our worship. The churches do not have the liturgical means of celebrating the life of animals, giving thanks for their companionship, praying for the relief of their suffering, or marking their death. This unique book provides a variety of liturgies that are animal-friendly and animal-inclusive. They include services in celebration of animal companionship, services for animal welfare, healing liturgies, new eucharistic prayers for the whole creation, and animal burial services. Underlying all these new forms is a serious theological purpose: to help us to draw deeper into the mystery of God's work in creation and to affirm other sentient beings as co-creatures with us.

Creaturely Theology David Clough, 2013-02-11 Creaturely Theology is a ground-breaking scholarly collection of essays that maps out the agenda for the future study of the theology of the non-human and the post-human. A wide range of first-rate contributors show that theological reflection on non-human animals and related issues are an important though hitherto neglected part of the agenda of Christian theology and related disciplines. The book offers a genuine interdisciplinary conversation between theologians, philosophers and scientists and will be a standard text on the theology of non-human animals for years to come. Contributors include: Esther D. Reed (Exeter), Rachel Muers (Leeds), Stephen Clark (Liverpool), Neil Messer (Lampeter), Peter Scott (Manchester), Michael Northcott (Edinburgh), Christopher Southgate (Exeter)

Animal Gospel Andrew Linzey, 2000-01-01 Our treatment of animals is a gospel issue, Andrew Linzey contends, because those individuals and institutions that could have become the voice of God's most vulnerable creatures have instead justified cruelty and oppression. He offers an inspiring personal account of the gospel truths that have sustained his commitment to the cause of animals for more than twenty-five years.

Animals as Religious Subjects Celia Deane-Drummond, Rebecca Artinian-Kaiser, David L. Clough, 2013-08-15 This book examines one of the most pressing cultural concerns that surfaced in the last decade - the question of the place and significance of the animal. This collection of essays represents the outcome of various conversations regarding the animal

studies and shows multidisciplinary at its very best, namely, a rigorous approach within one discipline in conversation with others around a common theme. The contributors discuss the most relevant disciplines regarding this conversation, namely: philosophy, anthropology, religious studies, theology, history of religions, archaeology and cultural studies. The first section, *Thinking about Animals*, explores philosophical, anthropological and religious perspectives, raising general questions about the human perception of animals and its crucial cultural significance. The second section explores the intriguing topic of the way animals have been used historically as religious symbols and in religious rituals. The third section re-examines some Christian theological and biblical approaches to animals in the light of current concerns. The final section extends the implications of traditional views about other animals to more specific ethical theories and practices.

Christianity and the Rights of Animals Andrew Linzey, 2016-03-03 Christian concern about how we treat animals has increased strikingly in recent years. More and more Christians are deciding that our attitudes toward animals must change. Here is a book that presents, for the first time, a comprehensive and well-argued theological case for the rights of animals, and offers a challenging critique of our existing insensitivity toward animal life. Everyone who cares about the rights of animals, particularly clergy and ministers who are constantly being asked for answers on the issue, will welcome this new and important book.

A Faith Embracing All Creatures Tripp York, Andy Alexis-Baker, 2012-11-09 What is the purpose of animals? Didn't God give humans dominion over other creatures? Didn't Jesus eat lamb? These are the kinds of questions that Christians who advocate compassion toward other animals regularly face. Yet Christians who have a faith-based commitment to care for other animals through what they eat, what they wear, and how they live with other creatures are often unsure how to address these biblically and theologically based challenges. In *A Faith Embracing All Creatures*, authors from various denominational, national, ethnic, and cultural backgrounds wrestle with the text, theology, and tradition to explain the roots of their desire to live peaceably with their nonhuman kin. Together, they show that there are no easy answers on what the Bible says about animals. Instead, there are nuances and complexities, which even those asking these questions may be unaware of. Editors Andy Alexis-Baker and Tripp York have gathered a collection of essays that wrestle with these nuances and tensions in Scripture around nonhuman animals. In so doing, they expand the discussion of nonviolence, peacemaking, and reconciliation to include the oft-forgotten other members of God's good creation.

Systematic Theology Anthony C. Thiselton, 2015-10-21 In this concise, one-volume systematic theology, celebrated scholar Anthony Thiselton comprehensively covers the spectrum of Christian doctrine with an eye to practical application for Christian discipleship. Written with students and busy ministers in mind, this book is readable and accessible, comprising fifteen chapters of relatively equal length, with each chapter containing five evenly balanced subsections for teaching and learning convenience. Rather than setting out an abstract system, Thiselton explores theology as a living, organic whole. The

book thus includes biblical foundations, historical thought, contemporary writers, and practical implications. Expertly incorporating biblical exegesis, philosophy, conceptual grammar, and hermeneutics, this work is the most succinct multidisciplinary systematic theology available.

Animals and Christianity Andrew Linzey, Tom Regan, 2007-11-01 What does the Christian tradition say about the condition and rights of animals? This helpful and timely anthology of selections from the Bible and from the great Christian thinkers of all times is an essential primer for those who care about animals. The book is organized around four themes--Attitudes to Creation; the Problem of Pain; the Question of Animal Redemption; and Reverence, Responsibilities, and Rights--and concludes with a section on practical issues--Animal Experimentation, Fur-Trapping, Hunting for Sport, Intensive Farming, and Killing for Food. This book includes selections from the following: the Bible, St. Thomas Aquinas, St. Augustine, Karl Barth, St. Bonaventure, John Calvin, Rene Descartes, Austin Farrer, John Hick, St. Irenaeus, St. John of the Cross, C. S. Lewis, St. Thomas More, E. F. Schumacher, Albert Schweitzer, Paul Tillich, Leo Tolstoy, Alec Vidler, John Wesley, and others

Systematic Theology Vol 1 Wolfhart Pannenberg, 2004-07-09 In Pannenberg's seminal work, the Christian doctrine of God is discussed using exegetical analysis across a number of disciplines. Truth, the nature of revelation, the language used to discuss God, the trinity, and theology in the public sphere are topics for debate.

Animals, Theology and the Incarnation Kris Hiuser , 2017-05-30 How does an understanding of the non-human lead us to a greater understanding of the incarnation? Are non-human animals morally relevant within Christian theology and ethics? Is there a human ethical responsibility towards non-human animals? In *Animals, Theology and the Incarnation*, Kris Hiuser argues that if we are called to represent both God to creation, and creation to God, then this has considerable bearing on understanding what it means to be human, as well as informing human action towards non-human creatures.

The Routledge Handbook of Religion and Animal Ethics Andrew Linzey, Clair Linzey, 2018-09-29 The ethical treatment of non-human animals is an increasingly significant issue, directly affecting how people share the planet with other creatures and visualize themselves within the natural world. The *Routledge Handbook of Religion and Animal Ethics* is a key reference source in this area, looking specifically at the role religion plays in the formation of ethics around these concerns. Featuring thirty-five chapters by a team of international contributors, the handbook is divided into two parts. The first gives an overview of fifteen of the major world religions' attitudes towards animal ethics and protection. The second features five sections addressing the following topics: Human Interaction with Animals Killing and Exploitation Religious and Secular Law Evil and Theodicy Souls and Afterlife This handbook demonstrates that religious traditions, despite often being anthropocentric, do have much to offer to those seeking a framework for a more enlightened relationship between humans and non-human animals. As such, *The Routledge Handbook of Religion and Animal Ethics* is essential reading for students

and researchers in religious studies, theology, and animal ethics as well as those studying the philosophy of religion and ethics more generally.

God, Evolution, and Animal Suffering Bethany N. Sollereder, 2018-10-29 After the publication of *On the Origin of Species* in 1859, theologians were faced with the dilemma of God creating through evolution. Suddenly, pain, suffering, untimely death and extinction appeared to be the very tools of creation, and not a result of the sin of humanity. Despite this paradigm shift, the question of non-human suffering has been largely overlooked within theodicy debates, overwhelmed by the extreme human suffering of the twentieth century. This book redresses this imbalance by offering a rigorous academic treatment of the questions surrounding God and the suffering of non-human animals. Combining theological, philosophical, and biblical perspectives, this book explores the relationship between God and Creation within Christian theology. First it dismantles the popular theological view that roots violence and suffering in the animal kingdom in the fall of humanity. Then, through an exploration of the nature of love, it affirms that there are multiple reasons to suggest that God and creation can both be good, even with the presence of violence and suffering. This is an innovative exploration of an under-examined subject that encompasses issues of theology, science, morality and human-animal interactions. As such, it will be of keen interest to scholars and academics of religion and science, the philosophy of religion, theodicy, and biblical studies.
