Practical Economics Nika Gilauri, 2016-12-26 This book is open access under a CC BY license. In this book, Nika Gilauri reveals his formulas for government reform and economic recovery, including how to fight against corruption, reform fiscal policy and tax systems, privatize state-owned enterprises, build a welfare system for those most in need, create a competitive education and healthcare system, and streamline procurement. All formulas are corroborated by practical experience and empirical evidence gathered during Mr Gilauri's term as a cabinet member (2004-2009) and prime minister (2009-2012) of Georgia, and provide an in-depth view of what worked in the case of Georgia since 2003, and how lessons learned could be applied in other parts of the world.

Contemporary Labor Economics Campbell R. McConnell, Stanley L. Brue, David A. Macpherson, 2003 This textbook presents the new labor economics. While traditional topics such as labor law, structure of unions, and collective bargaining are included, the focus is on labor economics as an applied field of micro and macro theory. The authors assert that labor economics has become a critical part of the core of analytical economics and not merely tangential. Micro and Macro Economic principles are the only prerequisites to this one term book.

Forestry Economics John E. Wagner, 2011-07-26 Forestry Economics introduces students and practitioners to all

aspects of the management and economics of forestry. The book adopts the approach of managerial economics textbooks and applies this to the unique processes and problems faced by managers of forests. While most forestry economics books are written by economists for future economists, what many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions. John E. Wagner draws on his twenty years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers. There are three unique features of this book: The first is its organization. The material is organized around two common economic models used in forest and natural resources management decision making. The second is the use of case studies from various disciplines: Outdoor and Commercial Recreation, Wood Products Engineering, Forest Products, and Forestry. The purpose of these case studies is to provide students with applications of the concepts being discussed within the text. The third is revisiting the question of how to use economic information to make better business decisions at the end of each chapter. This ties each chapter to the preceding ones and reinforces the hypothesis that a solid working knowledge of these economic models and the information they contain are necessary for making better business decisions. This textbook is an invaluable source of clear and accessible information on forestry economics and management for not only economics students, but for students of other disciplines and those already working in forestry and natural resources.

Modern Portfolio Theory and Investment Analysis Edwin J. Elton, Martin J. Gruber, Stephen J. Brown, William N. Goetzmann, 2014-01-21 Modern Portfolio Theory and Investment Analysis, 9th Edition examines the characteristics and analysis of individual securities, as well as the theory and practice of optimally combining securities into portfolios. It stresses the economic intuition behind the subject matter while presenting advanced concepts of investment analysis and portfolio management. The authors present material that captures the state of modern portfolio analysis, general equilibrium theory, and investment analysis in an accessible and intuitive manner.

An Inquiry Into the Nature and Causes of the Wealth of Nations Adam Smith, 1822

Principles of Microeconomics Robert H. Frank, 2021-04 Our fourth streamlined edition arrives in the midst of some of the most dramatic upheavals ever witnessed, both in the economy generally and in higher education in particular. The COVID-19 pandemic has produced levels of unemployment not seen since the Great Depression and has created dramatic changes in the ways we teach across educational institutions at every level. These developments have reinforced our confidence in the instructional philosophy that motivated us to produce our first edition--

Microeconomics, Brief Edition Campbell McConnell, Stanley Brue, Sean Flynn, 2009-02-20 McConnell and Brue's Microeconomics, Brief Edition comes from the same author team as the market-leading Principles of Microeconomics textbook. It continues to be innovative while teaching students in a clear, unbiased way. Like the 18th edition, Microeconomics, Brief Edition has 3 main goals: help the beginning student master the principles essential for understanding the economizing problem, specific economic issues, and the policy alternatives; help the student understand and apply the economic perspective and reason accurately and objectively about economic matters; and promote a lasting student interest in economics and the economy. Although the Brief Edition is a derivative of Microeconomics 18e, it is not a cut-and-paste book that simply eliminates several chapters of Economics 18e and reorders and rennumbers the retained content. Instead, Microeconomics, Brief Edition is a very concise, highly integrated economics textbook that is distinct in purpose, style, and coverage from Microeconomics 18e.
