**Critical Care Study Guide** Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up-to-date clinical information. An extensive knowledge of basic pathophysiology, as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.

Is Samuel Among the Deuteronomists Cynthia Edenburg, Juha Pakkala,2013-10-15 The book of Samuel tells the story of the origins of kingship in Israel in what seems to be an artistically structured, flowing narrative. Yet it is also marked by an inconsistent outlook, divergent styles, and breaks in the narrative. According to Noth's Deuteronomistic History hypothesis, the Deuteronomistic historian constructed the narrative by piecing together early sources and generally refrained from commenting in his own voice. Recent studies have called into question the extent of Samuel's sources and their redaction history, as well as the textual growth of the book as a whole. The essays in this book, representing the latest scholarship on this subject, reexamine whether the book of Samuel was ever part of a Deuteronomistic History. The contributors are A. Graeme Auld, Hannes Bezzel, Philip R. Davies, Walter Dietrich, Cynthia Edenburg, Jeremy M. Hutton, Jürg Hutzli, Ernst Axel Knauf, Reinhard Müller, Richard D. Nelson, Christophe Nihan, K. L. Noll, Juha Pakkala, and Jacques Vermeulen.

*Divine Scapegoats* Andrei A. Orlov, 2015-02-10 Explores the paradoxical symmetry between the divine and demonic in early Jewish mystical texts. *Divine Scapegoats* is a wide-ranging exploration of the parallels between the heavenly and the demonic in early Jewish apocalyptic accounts. In these materials, antagonists often mirror features of angelic figures, and even those of the Deity himself, an inverse correspondence that implies a belief that the demonic realm is maintained by imitating divine reality. Andrei A. Orlov examines the sacerdotal, messianic, and creational aspects of this mimetic imagery, focusing primarily on two texts from the Slavonic pseudepigrapha: 2 Enoch and the Apocalypse of Abraham. These two works are part of a very special cluster of Jewish apocalyptic texts that exhibit features not only of the apocalyptic worldview but also of the symbolic universe of early Jewish mysticism. The Yom Kippur ritual in the Apocalypse of Abraham, the divine light and darkness of 2 Enoch, and the similarity of mimetic motifs to later developments in the Zohar are of particular importance in Orlov's consideration.

**A Law Book for the Diaspora** John Van Seters, 2002-11-21 The foundation for all study of biblical law is the assumption that the Covenant Code is the oldest legal code in the Hebrew Bible and that all other laws are revisions of that code. This book sets forth the radical hypothesis that those laws in the covenant code that are similar to Deuteronomy and the Holiness Code are in fact later than both of these, and therefore can't be taken as the foundation of Hebrew Law.

*Determinism in the Book of Ecclesiastes* Dominic Rudman, 2001-09-01 Is the author of Ecclesiastes a determinist? Many readers, from the Targumist and Ibn Ezra up to the present day, have thought so. But there has been no systematic investigation of Qoheleth's determinism, its nature and extent, its relationship to free will and its philosophical background. In separate chapters, Rudman discusses key terms and texts that express a deterministic worldview, then explores the sources for Qoheleth's thought. He concludes that the author was a sage writing in the third quarter of the third century BCE, who was profoundly influenced by Stoic ideas.

*Manual of Simulation in Healthcare* Richard H. Riley,2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical, nursing, and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation, medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation. Simulation has been used to enhance the educational experience in a diverse range of fields; therefore a wide variety of disciplines are represented. The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding, equipment, staffing and course development, and promotion. Section two deals with simulators and related training devices that are required to equip a stand-alone or institution-based centre. The features, strengths, and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements. There is a guide to producing scenarios and medical props that can enhance the training experience. The third section covers adult education and it reviews the steps required to develop courses that comply with 'best practice' in medical education. Teaching skills, facilitating problem-based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education. The manual concludes with guides for the major specialties that use simulation, including military, paediatrics, CPR and medical response

teams, obstetrics, and anesthesia.

The book refines the exegetical method of literary and redaction criticism, and its results have important consequences for the future use of the Hebrew Bible in historical and theological studies. Features: Hebrew, Greek, and Aramaic examples of editorial activity Clear explanations of the distinctions between textual, literary, and redaction criticism Fifteen chapters attesting to continual editorial activity in the Torah, the Prophets, and the Writings
