Positive Peer Culture Larry K. Brendtro, Harry H. Vorrath, 2011-12-31 This revision of an important and path-breaking work holds to its central argument that troubled young people can develop self-worth, significance, dignity, and responsibility only through commitment to the positive values of helping and caring for others. An enlarged and revised edition of the authors' pioneering work on building positive youth culture, Positive Peer Culture retains the practical orientation that made the original attractive to teachers and youth workers, while adding new material on positive peer culture (PPC) in schools and community settings, research on PPC, and guidelines for maintaining program effectiveness and quality. Concepts of positive peer culture have been applied in a wide variety of educational and treatment settings including public and alternative schools, group homes, and residential centers. Vorrath and Brendtro describe specific procedures for getting youth hooked on helping through peer counseling groups, and for generalizing caring behavior beyond the school or treatment environment through community-based service learning projects. The authors contend that the young people who populate our nation's schools are in desperate need of an antidote to the narcissism, malaise and antisocial life-styles that have become so prevalent, and that this book seeks to provide a way of meeting their increasing cry to be used in some demanding cause. On publication of the first edition, Richard P. Barth, Frank A. Daniels Professor for Human Services Information Policy, School of Social Work, University of North Carolina at Chapel Hill called Positive Peer Culture a significant contribution to the field.

influencing the way children collectively interpret their surroundings and deal with the common problems they face.

Join the Club Tina Rosenberg, 2011-04-08 In the style of Nudge or The Spirit Level - a groundbreaking book that will change the way you look at the world. Tina Rosenberg has spent her career tackling some of the world's hardest problems. The Haunted Land, her searing book on how Eastern Europe faced the crimes of Communism, was awarded both the National Book Award and the Pulitzer Prize in the US. In Join the Club, she identifies a brewing social revolution that is changing the way people live, based on harnessing the positive force of peer pressure. Her stories of peer power in action show how it has reduced teen smoking in the United States, made villages in India healthier and more prosperous, helped minority students get top grades in college calculus, and even led to the fall of Slobodan Milosevic. She tells how creative social entrepreneurs are starting to use peer pressure to accomplish goals as personal as losing weight and as global as fighting terrorism. Inspiring and engrossing, Join the Club explains how we can better our world through humanity's most powerful and abundant resource: our connections with one another.

From Neurons to Neighborhoods National Research Council, Institute of Medicine, Board on Children, Youth, and

Families, Committee on Integrating the Science of Early Childhood Development, 2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of expertise. The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about brain wiring and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

Identity Development of College Students Susan R. Jones, Elisa S. Abes, 2013-02-05 *Identity Development of College Students* Building off the foundational work of Erik Erikson and Arthur Chickering, *Identity Development of College Students* adds broad and innovative research to describe contemporary perspectives of identity development at the intersection of context, personal characteristics, and social identities. The authors employ different theoretical perspectives to explore the nature of context—how it both influences and is influenced by multiple social identities. Each chapter includes discussion and reflection questions and activities for individual or small group work. Praise for *Identity Development of College Students* Susan R. Jones and Elisa S. Abes have provided us with a comprehensive and beautifully written overview of the evolution of identity development theory. This book reads like a novel while at the same time conveying important ideas, critical analysis, and cutting-edge research that will enhance student affairs practice. —NANCY J. EVANS, professor, Student Affairs Program, School of Education, Iowa State University The authors masterfully present a holistic, integrative, and multi-dimensional approach to the identity development of today's college student. This text should be required reading for those engaged in research and practice in the areas of student affairs, counseling, higher education, and cultural studies. —SHARON KIRKLAND-GORDON, director, Counseling Center, University of Maryland, College Park Susan R. Jones and Elisa S. Abes's work is ground-breaking—charting new scholarly territory and making one of the most significant contributions to identity literature in many years. Building on contemporary and traditional theoretical foundations, Jones and Abes offer new models of identity development essential for understanding a diversity of college students. —MARYLU K. MCEWEN, associate professor emerita, University of Maryland, College Park

Most Good, Least Harm Zoe Weil, 2009-01-06 With a world steeped in materialism, environmental destruction, and injustice, what can one individual possibly do to change it? While the present obstacles we face may seem overwhelming,

author and humane educator Zoe Weil shows us that change doesn't have to start with an army. It starts with you. Through her straightforward approaches to living a MOGO, or most good, life, she reveals that the true path to inner peace doesn't require a retreat from the world. Rather, she gives the reader powerful and practicable tools to face these global issues, and improve both our planet and our personal lives. Weil explores direct ways to become involved with the community, make better choices as consumers, and develop positive messages to live by, showing readers that their simple decisions really can change the world. Inspiring and remarkably inclusive of the interconnected challenges we face today, Most Good, Least Harm is the next step beyond green -- a radical new way to empower the individual and motivate positive change.

Peer Coaching to Enrich Professional Practice, School Culture, and Student Learning Pam Robbins, 2015-05-19 How can educators work together more effectively to improve professional practice in a way that enhances student performance? The answer, says author Pam Robbins, involves combining collaborative activities and peer coaching—teachers supporting teachers. This book describes how any school can implement these proven practices and experience positive changes in teaching, school culture, and learning. Robbins explains how to develop a collaborative, learning-focused culture and build trust among colleagues; offers strategies for participating in difficult conversations that yield useful feedback; clarifies how to develop, sustain, and evaluate peer coaching efforts; and showcases exemplary peer coaching practices used in real schools. She also includes coaching tools, scenarios, process guidelines, and reflection questions that make it easier to transfer these ideas into a school setting. Peer coaching offers a job-embedded learning strategy; it's a valuable structure for supporting schoolwide and districtwide priorities such as analyzing data, improving instruction, integrating technology, and implementing standards. In short, it creates an effective way to support the growth of every teacher and enrich learning processes in any school. Pam Robbins is a former teacher, coach, director of professional development, and school leader. She consults with high-performing and low-performing districts and designs and conducts workshops on leadership, school culture, organizational change, mentoring, and peer coaching.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus

to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Promoting Positive Adolescent Health Behaviors and Outcomes National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Applying Lessons of Optimal Adolescent Health to Improve Behavioral Outcomes for Youth, 2020-03-21 Adolescence is a critical growth period in which youth develop essential skills that prepare them for

adulthood. Prevention and intervention programs are designed to meet the needs of adolescents who require additional support and promote healthy behaviors and outcomes. To ensure the success of these efforts, it is essential that they include reliably identifiable techniques, strategies, or practices that have been proven effective. Promoting Positive Adolescent Health Behaviors and Outcomes: Thriving in the 21st Century identifies key program factors that can improve health outcomes related to adolescent behavior and provides evidence-based recommendations toward effective implementation of federal programming initiatives. This study explores normative adolescent development, the current landscape of adolescent risk behavior, core components of effective programs focused on optimal health, and recommendations for research, programs, and policies.
