The Origins and Development of Classical Hinduism
1991 Arthur Llewellyn Basham The late A.L. Basham was one of the world's foremost authorities on ancient Indian culture and religion. Modeled on his monumental work The Wonder That Was India, this account of the origins and development of classical Hinduism represents a lifetime of reflection on the subject, and offers an intriguing introduction to one of the richest of all Asian traditions. Synthesizing Basham's great knowledge of the art, architecture, literature, and religion of South Asia, this concise history traces the spiritual life of India from the time of the Indus Culture (around 2700 B.C.E) through the crystallization of classical Hinduism in the first centuries of the common era. It chronicles as well the rise of other mystical and ascetic traditions, such as Buddhism and Jainism, and follows Hinduism's later incarnations in the West, making it an especially comprehensive introduction to the subject. Unlike Christianity or Islam, Hinduism was not inspired by single great prophet but rather evolved organically. The wide range of influences and sources--along with the great number of sacred texts in ancient languages--can make the Hindu system of faith and practice seem almost impenetrable to the uninitiated. With its vivid presentation of Hinduism's sources--from the warrior Aryans to the wandering ascetics--and its clearly written explanations and analyses of the major Hindu texts--among them the Rg-veda, the Brahmanas, Upanishads, and the Mahabharata and Ramayana--The Origins of Classical Hinduism clarifies much
of Hinduism’s enduring mystique. With an especially helpful bibliography, numerous illustrations of Hindu art never before published, and a lucid, accessible style, this book is must reading for anyone who has ever been intrigued by this fascinating religion.

**The History of India**
2015-02-10 John McLeod This accessible, narrative account follows Indian history over its 9,000 year trajectory, from the ancient Harappans to today, emphasizing events and issues of the 20th and 21st centuries. Written for high school students and general readers who have little background on the world’s largest democracy, this second edition of a popular work provides an objective overview of Indian history with a particular focus on the modern nation. Approximately half of the book deals with developments since the beginning of the 20th century, with new chapters covering events and issues that made news between 2002 and 2014. Readers can learn about the Bollywood craze, 21st-century economic growth, and concerns about the safety and equality of women today, as well as about such traditional topics as Buddhism and Hinduism, the Mughal Dynasty, and the British East India Company. Caste politics and the establishment of the Republic of India are covered, as is the life of Mahatma Gandhi. Completely revised and expanded, the second edition features fresh content throughout and includes photographs that were not in the earlier volume. **The Oxford History of Hinduism: Modern Hinduism**
2019-06-27 Torkel Brekke The Oxford History of Hinduism: Modern Hinduism focuses on developments resulting from movements within the tradition as well as contact between India and the outside world through both colonialism and globalization. Divided into three parts, part one considers the historical background to modern conceptualizations of Hinduism. Moving away from the reforms of the 19th and early 20th century, part two includes five chapters each presenting key developments and changes in religious practice in modern Hinduism. Part three moves to issues of politics, ethics, and law. This section maps and explains the powerful legal and political contexts created by the modern state—first the colonial government and then the Indian Republic—which have shaped Hinduism in new ways. The last two chapters look at Hinduism outside India focusing on Hinduism in Nepal and the modern Hindu diaspora.

**Classical Hindu Thought**
2000 Arvind Sharma Introduces the texts and ideas of Hinduism, crystallized during the 4th to the 10th century BCE. This book explains their contemporary relevance and deals with the key concepts, the main gods and goddesses, and texts such as the Purusarthas. It also examines the different systems of yoga.

**Empowering Visions**
2005 Christiane Brosius Illustrated throughout with over 80 full colour images, Empowering Visions explores the role of images and mass media in Hindutva, the cultural-nationalist movement that moved to the forefront of politics in India in the late 1980s and early 1990s. The author investigates when, why and in what way the moving image, and videos in particular, came to play a central role in the process of self-representation and self-constitution of Hindu nationalist groups and organizations in the overlapping domains of politics, religion and economics. The videos analysed here have been included in massive public political spectacles such as election rallies and patriotic pilgrimages. They have also been employed for in-house indoctrination and emotive mobilization of militant cadres for temporary, often violent, agitation. With the help of these media, different political and cultural-religious organizations, subsumed under the umbrella of Hindutva, have attempted to constitute notions of 'Indianness' as 'Hinduness', to challenge and provoke both the government in power and specific minority groups such as the Muslims in India. How this was done, who stood behind the making of the videos and how they were made up and distributed, are questions that lie at the heart of this study. At a time when public attention is focused on transnational, and mostly Islamicist movements, *Empowering Visions* argues that both transnationalism and nationalism have to be treated with equal attention, and to some extent ought to be seen as intertwined processes. This book is unique in its presentation and discussion of profound ethnographic data through interviews with a variety of spokesmen for the Hindutva movement. It also offers an in-depth analysis of visual and audio-visual material that has so far been unrecognized and unexplored in scholarly works.

**Encyclopedia of Hinduism**
2012-08-21 Denise Cush The Encyclopedia of Hinduism contains over 900 entries reflecting recent advances in scholarship which have raised new theoretical and methodological issues as well as identifying new areas of study which have not been addressed previously. The debate over the term 'Hinduism' in the light of post-Orientalist critiques is just one example of how once standard academic frameworks have been called into question. Entries range from 150-word definitions of terms and concepts to 5,000-word in-depth investigations of major topics. The Encyclopedia covers all aspects of Hinduism but departs from other works in including more ethnographic and contemporary material in contrast to an exclusively textual and historical approach. It includes a broad range of subject matter such as: historical developments (among them nineteenth and twentieth century reform and revival); geographical distribution (especially the diaspora); major and minor movements; philosophies and theologies; scriptures; deities; temples and sacred sites; pilgrimages; festivals; rites of passage; worship; religious arts (sculpture, architecture, music, dance, etc.); religious sciences (e.g. astrology); biographies of leading figures; local and regional traditions; caste and untouchability; feminism and women's religion; nationalism and the Hindu radical right; and new religious movements. The history of study and the role of important scholars past and present are also discussed. Accessibility to all levels of reader has been a priority and no previous knowledge is assumed. However, the in-depth larger entries and the design of the work in line with the latest scholarly advances means that the volume will be of considerable interest to specialists. The whole is cross-referenced and bibliographies attach to the larger entries. There is a full index.

2009 Ann Morrill New Year's celebrations are times when families and friends come together to celebrate endings and new beginnings. When a religious element is added to these celebrations, there is also a sense of spiritual duty. Rather than simply 'ring in the New Year' with food and festivities, participants in religious New Year's celebrations consider the meaning of the holiday, the passage of time, and the opportunity for personal change. Focusing on Diwali (Hindu), Rosh Hashanah (Jewish), El am Hejir (Muslim), and Matariki (Maori), *Religious New Year's Celebrations* explores how cultures around the world contemplate the passage of time during these deeply sacred festivals.

South Asia
2008-03-06 Christopher V. Hill This work is a chronological study of South Asia that emphasizes the effect of humans on their environment, and in return the influence of nature on the evolution of human society. Ranging from prehistory to the present and encompassing the whole of South Asia, this volume in ABC-CLIO's Nature and Human Societies series offers the first chronological history of India, Pakistan, Bangladesh, Nepal, and Sri Lanka from the perspective of the crucial reciprocal relationship between humankind and the environment. South Asia: An Environmental History shows how the civilizations of this geographically diverse region were formed (physically, ethically, and culturally) by their interactions with the environment—a relationship with particularly strong social and spiritual dimensions because of the interdependence of the predominantly agrarian population and the land. Specific topics range from ancient irrigation techniques and peasant adaptation to the environment, to the impact of imperialism on nature, the effect of post-colonial technology on contemporary life, and the enduring influence of religion on the way South Asian societies address ecological issues.

Il monoteismo hindu

1997 Federico Squarcini Spesso l'induismo è stato presentato ed interpretato nell'occidente come mitologia, animismo, politeismo, panteismo e monismo. È vero che l'induismo si presta a tutte queste accezioni, proprio perché non è una religione, bensì "un mosaico di religioni"; una lunga esperienza umana nella quale si possono individuare le superstizioni più elementari, le mitologie più fantastiche, il culto delle pietre, dei fiumi, degli animali e degli alberi, dei progenitori defunti, dei pianeti e degli spiriti. Gli autori di questo lavoro intendono fornire delle precisazioni a riguardo del dibattito sulle matrici "tradizionali" dell'induismo. Trattando il tema del teismo storico induista, essi affermano inequivocabilmente la tesi fondamentale della presenza del monoteismo nell'induismo, contribuendo al rafforzarsi dell'interesse verso questi soggetti da parte dell'odierno contesto socio-culturale e religioso dell'occidente. Gli autori forniscono un essenziale strumento di lavoro che favorisce il conseguimento di una discreta conoscenza di questa articolata e profonda tendenza teista.

Rites of the God-King

2018-06-08 Marko Geslani Scholars of Vedic religion have long recognized the centrality of ritual categories to Indian thought. There have been few successful attempts, however, to bring the same systematic rigor of Vedic Scholarship to bear on later "Hindu" ritual. excavating the deep history of a prominent ritual category in "classical" Hindu texts, Geslani traces the emergence of a class of rituals known as santi, or appeasement. This ritual, intended to counteract ominous omens, developed from the intersection of the fourth Veda - the oft-neglected Atharvaveda - and the emergent tradition of astral science (Jyotisastra) sometime in the early first millennium, CE. Its development would come to have far-reaching consequences on the ideal ritual life of the king in early-medieval Brahmanical society. The mantric transformations involved in the history of santi led
to the emergence of a politicized ritual culture that could encompass both traditional Vedic and newer Hindu performers and practices. From astrological appeasement to gift-giving, coronation, and image worship, Rites of the God-King chronicles the multiple lives and afterlives of a single ritual mode, unveiling the always-inventive work of the priesthood to imagine and enrich royal power. Along the way, Geslani reveals the surprising role of astrologers in Hindu history, elaborates conceptions of sin and misfortune, and forges new connections between medieval texts and modern practices. In a work that details ritual forms that were dispersed widely across Asia, he concludes with a reflection on the nature of orthopraxy, ritual change, and the problem of presence in the Hindu tradition.

**Classical Hinduism**
1982 Mariasusai Dhavamony Hinduism has a span of three thousand years of history in which various forms of religious experience took shape and grew into a wide and rich variety of myths and cults, beliefs and practise, doctrines and disciplines, which have nurtured millions of Hindus throughout the ages. The exact ideas of Hinduism is hard to define since the beliefs and practices of the Hindus differ greatly from one period of history to another, and within a given period, from one region to another, and within a given region, from one class of society to another. In its traditional form the chief distinguishing features of its development are Vedism, Brahmanism, classical Hinduism, Sectarian Hinduism, Medieval Hinduism, Modern Hinduism and Contemporary Hinduism. These developments should not be considered as water-tight compartments, for they merge into one another. Hinduism has shown in its long history a marked propensity to assimilate rather than exclude various religious currents which once used to be considered alien to its own orthodoxy; this feature divides sharply Hinduism from other religions, for example, from Islam and to a certain extent at least in its beginning, Judaism; These religions in their strict form reject as false all other religious beliefs and practices.

**The Oxford History of Hinduism: Hindu Practice**
2020-08-20 Gavin Flood Traditions of asceticism, yoga, and devotion (bhakti), including dance and music, developed in Hinduism over long periods of time. Some of these practices, notably those denoted by the term yoga, are orientated towards salvation from the cycle of reincarnation and go back several thousand years. These practices, borne witness to in ancient texts called Upaniṣads, as well as in other traditions, notably early Buddhism and Jainism, are the subject of this volume in the Oxford History of Hinduism. Practices of meditation are also linked to asceticism (tapas) and its institutional articulation in renunciation (samnyāsa). There is a range of practices or disciplines from ascetic fasting to taking a vow (vrata) for a deity in return for a favour. There are also devotional practices that might involve ritual, making an offering to a deity and receiving a blessing, dancing, or visualization of the master (guru). The overall theme—the history of religious practices—might even be seen as being within a broader intellectual trajectory of cultural history. In the substantial introduction by the editor this broad history is sketched, paying particular attention to what we might call the medieval period (post-Gupta) through to modernity when traditions had significantly developed in relation to each other. The chapters in the book chart the history of Hindu practice, paying particular attention to indigenous terms and recognizing indigenous distinctions such as between the ritual life of the householder and the renouncer seeking liberation, between ‘inner’ practices of and ‘external’ practices of ritual, and between those desirous of liberation (mumukṣu) and those desirous of pleasure and worldly success (bubhuksu). This whole range of meditative and devotional practices that have developed in the history of Hinduism are represented in this book.

**Making Sense of Mind Only**

2023-11-07 William S. Waldron Through engaging, contemporary examples, Making Sense of Mind Only reveals the Yogacara school of Indian Buddhism as a coherent system of ideas and practices for the path to liberation, contextualizing its key texts and rendering them accessible and relevant. The Yogacara, or Yoga Practice, school is one of the two schools of Mahayana Buddhism that developed in the early centuries of the common era. Though it arose in India, Mahayana Buddhism now flourishes in China, Tibet, Korea, Vietnam, and Japan. While the other major Mahayana tradition, the Madhyamaka (Middle Way), focuses on the concept of emptiness—that all phenomena lack an intrinsic essence—the Yogacara school focuses on the cognitive processes whereby we impute such essences. Through everyday examples and analogues in cognitive science, author William Waldron makes Yogacara’s core teachings—on the three turnings of the Dharma wheel, the three natures, the storehouse consciousness, and mere perception—accessible to a broad audience. In contrast to the common characterization of Yogacara as philosophical idealism, Waldron presents Yogacara Buddhism on its own terms, as a coherent system of ideas and practices, with dependent arising its guiding principle. The first half of Making Sense of Mind Only explores the historical context for Yogacara’s development. Waldron examines early Buddhist texts that show how our affective and cognitive processes shape the way objects and worlds appear to us, and how we erroneously grasp onto them as essentially real—perpetuating the habits that bind us to samsara. He then analyzes the early Madhyamaka critique of essences. This context sets the stage for the book’s second half, an examination of how Yogacara texts such as the Samdhinirmocana Sutra and Asanga’s Stages of Yogic Practice (Yogacarabahumi) build upon these earlier ideas by arguing that our constructive processes also occur unconsciously. Not only do we collectively, yet mostly unknowingly, construct shared realities or cultures, our shared worlds are also mediated through the storehouse consciousness (alayavijñana) functioning as a cultural unconscious. Vasubandhu’s Twenty Verses argues that we can learn to recognize such objects and worlds as “mere perceptions” (vijñaptimatra) and thereby abandon our enchantment with the products of our own cognitive processes. Finally, Maitreya’s Distinguishing Phenomena from Their Ultimate Nature (Dharmadharmatavibhaga) elegantly lays out the Mahayana path to this transformation. In Waldron’s hands, Yogacara is no mere view but a practical system of transformation. His presentation of its key texts and ideas illuminates how religion can remain urgent and vital in our scientific and pluralistic age.

**The Oxford History of Hinduism: Hindu Law**

2017-12-08 Patrick Olivelle Through pointed studies of important aspects and topics of dharma in Dharmashastra, this comprehensive collection shows that the history of Hinduism cannot be written without the history of Hindu law. Part One provides a concise overview of the literary genres in which Dharmasastra was written with attention to chronology and historical developments. This study divides the tradition into its two major historical periods—the origins and formation of the classical texts and the later genres of commentary and digest—in order to provide a thorough, but manageable overview of the textual bases of the tradition. Part Two presents descriptive and historical studies of all the major substantive topics of Dharmasastra. Each chapter offers readers with saelest knowledge of the debates, transformations, and fluctuating importance of each topic. Indirectly, readers will also gain insight into the ethos or worldview of religious law in Hinduism, enabling them to get a feel for how dharma authors thought and why. Part Three contains brief studies of the impact and reception of Dharmasastra in other South Asian cultural and textual
derived traditions. Finally, Part Four draws inspiration from "critical terms" in contemporary legal and religious studies to analyze Dharmasastra texts. Contributors offer interpretive views of Dharmasastra that start from hermeneutic and social concerns today.

The Spiritual Imagination of the Beats

2017-08-17 David Stephen Calonne The Spiritual Imagination of the Beats is the first comprehensive study to explore the role of esoteric, occult, alchemical, shamanistic, mystical and magical traditions in the work of eleven major Beat authors. The opening chapter discusses Kenneth Rexroth and Robert Duncan as predecessors and important influences on the spiritual orientation of the Beats. David Stephen Calonne draws comparisons throughout the book between various approaches individual Beat writers took regarding sacred experience - for example, Burroughs had significant objections to Buddhist philosophy, while Allen Ginsberg and Jack Kerouac both devoted considerable time to studying Buddhist history and texts. This book also focuses on authors who have traditionally been neglected in Beat Studies - Diane di Prima, Bob Kaufman, Philip Lamantia and Philip Whalen. In addition, several understudied work such as Gregory Corso's 'The Geometric Poem' - inspired by Corso's deep engagement with ancient Egyptian thought - are given close attention. Calonne introduces important themes from the history of heterodoxy - from Gnosticism, Manicheanism and Ismailism to Theosophy and Tarot - and demonstrates how inextricably these ideas shaped the Beat literary imagination.

Sprains and Strains in Adolescents

Sprains and strains are among the majority of the injuries caused while playing sports. Sports injuries can be caused by small trauma which involves ligaments, muscles and tendons including bruises, sprains and strains. The body part which is most commonly involved in spraining or straining is the ankle. The 3 ligaments that are involved during ankle sprain or strain include anterior talofibular ligament, posterior talofibular ligament and calcaneofibular ligament.

An injury caused to the soft tissue as a result of a direct force like fall, kick and blow is called a contusion or a bruise. A sprain is nothing but a ligament injury which is wrenched or twisted. Sprains usually affect knees, wrists and ankles. On the other hand a strain is an injury caused to a tendon or muscle which usually results from force, stretching and overuse.

Sprains/Strains are usually diagnosed by a physician after a physical examination. The physician asks for thorough medical history of the adolescent and asks various questions that lead to the cause of the injury. Various diagnostic procedures are also available which also helps in evaluating the problem. X-ray is one of the oldest and common diagnostic tests done to know the extent and exact location of the injury. An x-ray uses electromagnetic waves to get photos of internal tissues, organs and bones onto a film. MRI scan is one of the recently evolved diagnostic procedures which also help in evaluating a physical injury. This procedure actually called Magnetic Resonance Imaging makes use of bug magnets, computer and radio frequencies to get detailed pictures of structures and organs inside the body. Another diagnostic procedure called Computed Tomography Scan or CT scan is also used to evaluate the extent and location of injury. This procedure uses a blend of computers and x-rays to get cross sectional pictures in horizontal and vertical alignment. It shows thorough pictures of any part of the body like muscles, bones, fat and organs. They provide more information than conventional x-rays.
In the long-term scenario bruises, sprains and strains heal pretty quickly in kids and teenagers but it is important that the adolescent sticks to the restrictions imposed during the treatment and healing process like restriction of activity and regularly attending physical therapy sessions if any. It is noted that majority of the sports related injuries results either due to traumatic injury or excessive use of muscles and joints. But, they can be avoided and prevented with right training, by wearing right protective gears and by using right equipment for training.

**Tennis Elbow in Adolescents**

Tennis elbow is a condition in which tendon fibers that attach on epicondyle on the elbow’s exterior degenerates. The tendons talked about here anchor the muscles that help wrist and hand to lift. Although tennis elbow occurs mostly in patients of thirty to fifty years of age but it can happen to people of any age. Also tennis elbow affects almost fifty percent of teenagers who are in racquet sports thus the name “tennis elbow”. But still most of the patients who suffer with tennis elbow are people who don’t play racquet sports. Majority if the times there isn’t any specific injury before the symptoms start showing up. Tennis elbow can also happen to people who use their forearm muscles frequently and vigorously for day to day work and recreational activities. Ironically some patients develop the condition without any of the activity related reasons that leads to the symptoms.

The symptoms of tennis elbow include severe burning pain on the elbow’s exterior region. In majority of the cases this starts as a slow and mild pain gradually worsening with the passage of few weeks or sometimes months. The pain worsens when one tries to lift objects. In some cases it may pain even while lifting light objects like a book or full coffee cup. In the severest cases it can pain even at the movement of the elbow.

Life Lessons from *The Origins And Development Of Classical Hinduism By Basham Al Published By Oxford University Press Usa 1991* ~ Bigger is better is believed in by many. That’s exactly what some of the small firms think when they want to advertise their product. They think bigger and select a medium where they need to invest a lot of money, but do not reach the targeted market. Like if a company specializes in designing diet plans and want to help out people who had disappointing results from their individual diet plans, and the company chooses to advertise a full page in the local paper instead of running advertisement in a health magazine, obviously not many of the dieters will notice the advertisement and the advertisement doesn’t get the desired attention.

So the point is to come up with the best campaign, which will increase the probability of the ad getting viewed and the right customers trying to buy the product or sign up for the service. Studies and research can be carried out on the market and targeted audience can be narrowed down. Once getting the list of newspapers, magazines and magazines meant for the customers in mind, find out how many readers they have and the cost they ask for posting the ad. Special deals are offered by them from time to time and can only be found by watchful eye.

It is estimated that everyday people are subjected to around three thousand commercials. That is a huge number and if someone desires to be noticed, he should certainly be different. Not only the services and product sold should be unique in the market, so should be the advertisement. For example, if a business selling mattresses says, “We sell mattresses”, it will not make a statement and will be passed off as any other mattress advertisement. But if they say, “Our mattresses are of the finest quality”, it will make the advertisement stand out in the crowd. Other catch lines are “Are you suffering from back pain? Probably you must try our mattresses”, are more specific and will catch the fancy of the people who are suffering from back pains since a long time. The advertisement should also focus on the uniqueness of the product and how it is better compared to the competitors’ product.
There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system’s function as the systems attacks the pancreas’ insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn’t treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type 2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

Focusing on the problems of the customers and giving a solution for them, is what a customer demands. A customer does not buy a product; he buys benefits in the form of a product. The real value of the product should be realized and a clear picture of it should be presented to the customer so he will be able to relate with the product. If the advertisement doesn’t specify the solution it can provide, the customers will never know of it. So focusing on the customers problem is what some ads miss.

The last thing missing in most of the advertisement is motivation for the customers. If the advertiser has designed the advertisement and the customer had read the advertisement, all efforts and money invested will be wasted if he doesn’t get up and do something about it. It shouldn’t be assumed that the customer knows what to do; instead the advertisement should influence the mind of the customer and should tell him what to do. Call of action is the final job of the advertisement. It should call for information, or visiting the store or even visiting the online store. The message should sound confident and clear.

**Different types of Television Commercials**

Since the time the first ever commercial to be aired on television of Bulova Watch Company in July 1, 1941 many categories of advertisements have been formed. The advertisements have become a part and parcel of daily life and are playing a significant role in decision making of the consumers. Such has become the power of advertisement that even a politician cannot assure his success in election campaign in if he hasn’t advertised on television. The different categories of television advertising are political advertising, promotional advertising,

If the church doesn’t want to hire a skilled force of financial experts, they can simply make use of the church accounting software. Accounting experts designed the software and it can assist church officials in managing finances. The software engineers are already well-acquainted with the church’s various needs and so they can easily tailor-fit a certain church’s software according to its particular requirements.

The church accounting software is quite different from other software. Ordinary accounting software is designed to suit the needs of modern businesses. The church accounting software on the other hand focuses mainly on the necessities of the institution. The church has no ambition or any financial interest. Remember, the church is not being taxed by the government and so its expenditure and resources takes a different curve altogether. Aside from that, the church has several expenditure and income account heads.

But acupuncture only reached the US in the early 80’s with the establishment of a regulatory board called the National Commission for Acupuncture and Oriental Medicine. As a result, various schools have been built and those who want to become licensed acupuncturists are now able to practice their profession.

Despite that, there were a lot of people who are not yet convinced on the positive effects of alternative forms of medication. It was only in 1995 that the US Food and Drug Administration decided to classify the needles used for acupuncture as medical instruments and assured the public that they are both safe and effective.

To further promote acupuncture, the NIH or National Institute of Health in 1997 has stated that this technique is very useful in treating various health conditions. These include ear, nose, throat, respiratory, gastrointestinal, eye, nervous system and muscular disorders. In some cases, acupuncture is able to prevent some of them from happening.

Research in Advertising

Research in advertising is done in order to produce better advertisements that are more efficient in motivating customers to buy a product or a service. The research can be based on a particular advertising campaign or can be more generalized and based on how advertisements create an effect on people’s mind. Lots of approaches are involved to go about conducting an advertising research like economical, psychological, demographical and sociological.

When designing an advertisement for a particular product many things should be researched like where it should be displayed, whether the advertisement can be printed in newspapers or magazines or broadcasted on television or radio or published on the Internet. Many methods are undertaken to collect relevant information. The research itself is of two kinds, syndicated and customized. Syndicated research is a single research done by the company that is available to other companies as well. Customized research is research based on certain criteria and is done for a particular company and its results are available to only that company.

Pre-testing or copy testing is a type of customized research that determines the in-market efficiency of an advertisement before it is released or before the final production. The more the pre-testing is done the more likely that it will be a successful advertisement and each pre-
testing should be applied number of times. This can done by studying the level of attention the customers have, motivation, brand linkage, communication and entertainment. Flow of emotions and flow of attention are broken down and studied individually. The results are applied on the advertisement that is still being developed to recognize the weak points and replace them. A reliable feedback loop can guide the researchers, client and the agency to work in harmony. Tests should be applied during the storyboard stage of ad making. This is an early stage and the results are highly predictive. During this process images are selected and used as integrated campaign print ad.

Play with customer’s psychology. Understand the difficulties faced by them and then show them how the company or the company’s product can solve it. Call of action can be given then and offer to clear their doubts. It should be more than just a helpline. The action should be really immediate. Simply don’t let the client slip away.

After the initial writing, write in detail about the product or service provided. This is in-depth information for those concerned about your company’s product. Point out the advantages of using them. Write them in a hierarchical form with numbering or bullets. If writing short paragraphs, strong sub-titles can be used as heading of individual paragraphs. Again, using adjectives will be good.

A good amount of entertainment factor should be added. This will retain the interest of the customer and will not distract him. But if lots of it is used, it will simply become shabby. It’s a nice idea to use product noun as a verb along with other adjectives.

Submit website and advertisements to search engines. Millions of people use it everyday to find what they need. If the website is search engine optimized, it will surely get lots of traffic. The name of the company and keywords should densely populate the website content. Make it a compulsion for the visitor to go through the advertisement before moving on to the registration or payment process. Some B2B websites don’t allow adding an email address or URL in the advertisement. They can be tracked in by actually spelling out dot or at in the email address or website link.
