Christian Moral Theology In The Emerging Technoculture From Posthuman Back To Human Ashgate Science And Religion

The Identity of Christian Morality

2016-03-03 Ann Marie Mealey This book argues that moral theology has yet to embrace the recommendations of the Second Vatican Council concerning the ways in which it is to be renewed. One of the reasons for this is the lack of consensus between theologians regarding the nature, content and uniqueness of Christian morality. After highlighting the strengths and weaknesses of the so-called autonomy and faith ethic schools of thought, Mealey argues that there is little dividing them and that, in some instances, both schools are simply defending one aspect of a hermeneutical dialectic. In an attempt to move away from the divisions between proponents of the faith-ethic and autonomy positions, Mealey enlists the help of the hermeneutical theory of Paul Ricoeur. She argues that many of the disagreements arising from the Christian proprium debate can be overcome if scholars look to the possibilities opened up by Ricoeur's hermeneutics of interpretation. Mealey also argues that the uniqueness of Christian morality is more adequately explained in terms of a specific identity (self) that is constantly subject to change and revision in light of many, often conflicting, moral sources. She advocates a move away from attempts to explain the uniqueness of Christian morality in terms of one specific, unchanging context, motivation, norm, divine command or value. By embracing the possibilities opened up by Ricoeurian hermeneutics, Mealey explains how concepts such as revelation, tradition, orthodoxy and moral conscience may be understood in a hermeneutical way without being deemed sectarian or unorthodox.

Re-Imagining Nature

2016-08-01 Alister E. McGrath Reimagining Nature is a new introduction to the fast developing area of natural theology, written by one of the world’s leading theologians. The text engages in serious theological dialogue whilst looking at how past developments might illuminate and inform theory and practice in the present. This text sets out to explore what a properly Christian approach to natural theology might look like and how this relates to alternative interpretations of our experience of the natural world Alister McGrath is ideally placed to write the book as one of the world’s best known theologians and a chief proponent of natural theology This new work offers an account of the development of natural theology throughout history and informs of its likely contribution in the present This feeds in current debates about the relationship between science and religion, and religion and the humanities Engages in serious theological dialogue, primarily with Augustine, Aquinas, Barth and Brunner, and includes the work of natural scientists, philosophers of science, and poets

Religion and Transhumanism

2014-11-17 Calvin Mercer Should technology be used to improve human faculties such as cognition and longevity? This thought-provoking dialogue between "transhumanism" and religion examines enhancement technologies that could radically alter the human species. "Transhumanism" or "human enhancement" is an intellectual and cultural movement that advocates the use of emerging
technologies to change human traits. Although they may sound like science fiction, the possibilities suggested by transhumanism are very real, and the questions they raise have no easy answers. If these enhancements—especially major ones like the indefinite extension of healthy human life—become widely available, they would arguably have a more radical impact on humankind than any other development in history. This book comprises essays that explore transhumanism and the issues that surround it, addressing numerous fascinating questions posed by scholars of religion from various traditions. How will “immortality” or extreme longevity change our religious beliefs and practices? How might pharmaceuticals enhance spiritual experiences? Will “post-human” technologies be available to all persons, or will a superior "post-human race" arise to dominate the human species? The discussions are as intriguing as the future they suggest.

**Just Capitalism**

2016-10-01 Brent Waters

Just Capitalism is a Christian moral defense of economic globalization as a system that is well-suited to provide the necessary material needs that are prerequisite for human community and flourishing. Global-based market exchange offers the development and distribution of the goods of creation for humans to enjoy and share. Globalization also offers "the most realistic and promising way of exercising a preferential option for the poor." Waters argues that economic globalization, and thus capitalism, is a necessary condition for sustaining human life but not a sufficient condition for enabling human flourishing. Even though globalization is generally compatible with Christian theological and moral claims and can realistically facilitate the well-being of the human family, it must be reoriented toward koinoniahuman community, communication, fellowships the global economy’s primary goal in order to help actualize human flourishing. Readers will gain insight about how economic globalization (and thus capitalism) is good for the human family and can be made better by certain reorientations that are compatible with Christian moral values. Waters provides a mature and civil counterargument against knee-jerk condemnations of economic globalization and capitalism.

**What Makes Us Moral?**

2012-10-23 Craig Hovey

Is science all we need to make us moral? In his recent book, The Moral Landscape, Sam Harris presents his vision of a world in which reason and science alone determine our values. Here, a leading Christian ethicist subjects this vision to a rigorous critique, providing general readers with a clear, concise, and compelling exposŽ of the most serious flaws in Harris's arguments.

**Christology and Ethics**

2010-06-28 F. LeRon Shults

This book brings together leading theologians and ethicists to explore the neglected relationship between Christology and ethics. The contributors to this volume work to overcome the tendency toward disciplinary xenophobia, considering such questions as What is the relation between faithful teaching about the reality of Christ and teaching faithfulness to the way of Christ? and How is christological doctrine related to theological judgments about normative human agency? With renewed attention and creative reformulation, they argue, we can discover fresh ways of tending to these perennial questions.

**Moral Theology**

2004 James Keating

Gathers together some of the top moral theologians to recognize and honour the work of James P. Hanigan, and to present their own personal visions on the present state and future direction of fundamental moral theology.

**Catholic Moral Theology and Social Ethics**

2013-12-01 Christina Astorga

Proposing a new method for moral theology, Christina Astorga seeks
to recast our understanding of the discipline by drawing from the faith vision of the entire theological enterprise, including scripture, dogmatic theology, social ethics, and spirituality.

**Virtue and Theological Ethics**  
2018-10-18 Salzman; Todd A. Eight story-reflections, each based on a different Beatitude, offer accounts of immigrant children who fled Central America on their own to escape violence and poverty. Artwork created by immigrant youth and meditations written by Jesuit Father Leo O’Donovan accompany the stories.

**Being as Communion**  
2016-04-15 William A. Dembski For a thing to be real, it must be able to communicate with other things. If this is so, then the problem of being receives a straightforward resolution: to be is to be in communion. So the fundamental science, indeed the science that needs to underwrite all other sciences, is a theory of communication. Within such a theory of communication the proper object of study becomes not isolated particles but the information that passes between entities. In Being as Communion philosopher and mathematician William Dembski provides a non-technical overview of his work on information. Dembski attempts to make good on the promise of John Wheeler, Paul Davies, and others that information is poised to replace matter as the primary stuff of reality. With profound implications for theology and metaphysics, Being as Communion develops a relational ontology that is at once congenial to science and open to teleology in nature. All those interested in the intersections of theology, philosophy and science should read this book.

**Human Evolution and Christian Ethics**  
2007-12-20 Stephen J. Pope Can the origins of morality be explained entirely in evolutionary terms? If so, what are the implications for Christian moral theology and ethics? Is the latter redundant, as socio-biologists often assert? Stephen Pope argues that theologians need to engage with evolutionary theory rather than ignoring it. He shows that our growing knowledge of human evolution is compatible with Christian faith and morality, provided that the former is not interpreted reductionistically and the latter is not understood in fundamentalist ways. Christian ethics ought to incorporate evolutionary approaches to human nature to the extent that they provide helpful knowledge of the conditions of human flourishing, both collective and individual. From this perspective, a strong affirmation of human dignity and appreciation for the theological virtues of faith, hope and charity is consistent with a revised account of natural law and the cardinal virtues.

**Explorations in Christian Theology and Ethics**  
2016-04-22 Michelle J. Bartel Engaging variously with the legacy of Paul L. Lehmann, these essays argue for a reorientation in Christian theology that better honours the formative power of the gospel to animate and shape doctrine and witness, as well as ethical and political life. The authors explore key themes in Christian theology and ethics - forgiveness, discernment, responsibility, spirituality, the present day tasks of theology and the role of faith in public life - making plain the unabated importance of Lehmann’s work at this juncture in contemporary theology. The internationally recognized contributors draw crucial connections between the gospel of reconciliation, the form of Christian theology and witness, and the challenges of contemporary ethical and political reflection. This book demonstrates why this close friend of Dietrich Bonhoeffer, and author of Ethics in a Christian Context and The Transfiguration of Politics continues to influence generations of theologians in both the English-speaking world and beyond.

**Theological Neuroethics**  
2017 Neil Messer “Neil Messer brings together a range of theoretical and practical questions raised by current research on the human brain: questions about both the ‘ethics of neuroscience’ and the
'neuroscience of ethics'. While some of these are familiar to theologians, others have been more or less ignored hitherto, and the field of neuroethics as a whole has received little theological attention. Drawing on both theological ethics and the science-and-theology field, Messer discusses cognitive-scientific and neuroscientific studies of religion, arguing that they do not give grounds to dismiss theological perspectives on the human self. He examines a representative range of topics across the whole field of neuroethics, including consciousness, the self and the value of human life; the neuroscience of morality; determinism, freewill and moral responsibility; and the ethics of cognitive enhancement."--Bloomsbury Publishing

**Cyborg Selves**

2016-05-13 Jeanine Thweatt-Bates What is the ‘posthuman’? Is becoming posthuman inevitable-something which will happen to us, or something we will do to ourselves? Why do some long for it, while others fearfully reject it? These questions underscore the fact that the posthuman is a name for the unknown future, and therefore, not a single idea but a jumble of competing visions - some of which may be exciting, some of which may be frightening, and which is which depends on who you are, and what you desire to be. This book aims to clarify current theological and philosophical dialogue on the posthuman by arguing that theologians must pay attention to which form of the posthuman they are engaging, and to demonstrate that a ‘posthuman theology’ is not only possible, but desirable, when the vision of the posthuman is one which coincides with a theological vision of the human.

**Christian Moral Theology in the Emerging Technoculture**

2016-05-23 Brent Waters We are living in an emerging technoculture. Machines and gadgets not only weave the fabric of daily life, but more importantly embody philosophical and religious values which shape the contemporary moral vision-a vision that is often at odds with Christian convictions. This book critically examines those values, and offers a framework for how Christian moral theology should be formed and lived-out within the emerging technoculture. Brent Waters argues that technology represents the principal cultural background against which contemporary Christian moral life is formed. Addressing contemporary ethical and religious issues, this book will be of particular interest to students and scholars exploring the ideas of Heidegger, Nietzsche, Grant, Arendt, and Borgmann.

**Themelios, Volume 40, Issue 1**

2015-05-18 D. A. Carson Themelios is an international, evangelical, peer-reviewed theological journal that expounds and defends the historic Christian faith. Themelios is published three times a year online at The Gospel Coalition (http://thegospelcoalition.org/themelios/) and in print by Wipf and Stock. Its primary audience is theological students and pastors, though scholars read it as well. Themelios began in 1975 and was operated by RTSF/UCCF in the UK, and it became a digital journal operated by The Gospel Coalition in 2008. Religion and Atheism
2016-11-25 Anthony Carroll Arguments between those who hold religious beliefs and those who do not have been at fever pitch. They have also reached an impasse, with equally entrenched views held by believer and atheist - and even agnostic - alike. This collection is one of the first books to move beyond this deadlock. Specially commissioned chapters address major areas that cut across the debate between the two sides: the origin of knowledge, objectivity and meaning; moral values and the nature of the human person and the good life; and the challenge of how to promote honest and fruitful dialogue in the light of the wide diversity of beliefs, religious and otherwise. Under these broad headings leading figures in the field examine and reflect upon: Secular and religious humanism The idea of the sacred The vexed issue of science in both religious and secular accounts of knowledge Spirituality for the godless Non-western perspectives on the atheism/theism debate. A key feature of the collection is a dialogue between Raymond Tallis and Rowan Williams, former Archbishop of Canterbury. Religion and Atheism: Beyond the Divide will interest anyone who is concerned about the clash between the religious and the secular and how to move beyond it, as well as students of ethics, philosophy of religion and religious studies.

From Human to Posthuman
2016-04-22 Brent Waters Technology is one of the dominant forces shaping the emerging postmodern world. Indeed the very fabric of daily life is dependent upon various information, communication, and transportation technologies. With anticipated advances in biotechnology, artificial intelligence, and robotics, that dependence will increase. Yet this growing dependence is accompanied with a deep ambivalence. For many technology symbolises the faith of the postmodern world, but it is an ambivalent faith encapsulating both our hopes and fears for the future. This book examines the religious foundations underlying this troubled faith in technology, as well as critically and constructively engaging particular technological developments from a theological perspective.

Jürgen Moltmann's Ethics of Hope
2009 Timothy Harvie This book develops a thorough account of the sphere of human moral action in sustained dialogue with Jürgen Moltmann. By examining God's role as promise-giver, particularly in the Christian understanding of resurrection, this work describes the occupancy of both history and space in moral terms. This leads to an understanding of Jesus' description of 'the kingdom of God' to
feature prominently in describing both the possibility and content of human moral action. By offering an account of each of the main doctrines found in Moltmann’s corpus - the role of the future, the Trinity, the Holy Spirit, and anthropology - this book locates how each contributes to the understanding of ethics from a Christian perspective and subsequently applies these findings to the contemporary issue of poverty and global economics.

**The Ethics of Superintelligent Design**

2018-03-07 Paul Golata Artificial intelligence (AI) permeates Google searches, the personal assistants in our smartphones, and is all over our newsfeeds. Watson’s machine learning has already started to revolutionize many important industries including oncology, law, finance, and entertainment. The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence (ASI). It is within this context that there is a prevailing need for a discussion of its ethical implications. As a Christian ethicist, Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative. ASI is a move toward the proper handling of information. However, how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses. This important ethical conversation is being led by humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the “wetware” of human brains. The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible, the supernatural creation account, a realistic view of the state of humanity, and biblical ethics.

**Personal Responsibility and Christian Morality**

1983-05-01 Josef Fuchs, SJ In this volume, Josef Fuchs has brought together 12 important essays which consider various aspects of the relationship between Christian morality and human behavior. Among the subjects he discusses are the connections between moral theology and Christian experience, the absolute character of moral norms, and the importance of ethical reflection in shaping the future of the human race.

**Biotechnology, Human Nature, and Christian Ethics**

God and the Moral Life

2017-11-02 Myriam Renaud How do various concepts of God impact the moral life? Is God ultimately required for goodness? In this edited collection, an international panel of contemporary philosophers and theologians offer new avenues of exploration from a theist perspective for these important questions. The book features several approaches to address these questions. Common themes include philosophical and theological conceptions of God with reference to human morality, particular Trinitarian accounts of God and the resultant ethical implications, and how communities are shaped, promoted, and transformed by accounts of God. Bringing together philosophical and theological insights on the relationship between God and our moral lives, this book will be of keen interest to scholars of the philosophy of religion, particularly those looking at ethics, social justice and morality.

Everyday Ethics

2019-10-01 Michael Lamb What might we learn if the study of ethics focused less on hard cases and more on the practices of everyday life? In Everyday Ethics, Michael Lamb and Brian Williams gather some of the world’s leading scholars and practitioners of moral theology (including some GUP authors) to explore that question in dialogue with anthropology and the social sciences. Inspired by the work of Michael Banner, these scholars cross disciplinary boundaries to analyze the ethics of ordinary practices—from eating, learning, and loving thy neighbor to borrowing and spending, using technology, and working in a flexible economy. Along the way, they consider the moral and methodological questions that emerge from this interdisciplinary dialogue and assess the implications for the future of moral theology.

The Roots of Religion

2016-02-24 Roger Trigg The cognitive science of religion is a new discipline that looks at the roots of religious belief in the cognitive architecture of the human mind. The Roots of Religion deals with the philosophical and theological implications of the cognitive science of religion which grounds religious belief in human cognitive structures: religious belief is ‘natural’, in a way that even
scientific thought is not. Does this new discipline support religious belief, undermine it, or is it, despite many claims, perhaps eventually neutral? This subject is of immense importance, particularly given the rise of the ‘new atheism’. Philosophers and theologians from North America, UK and Australia, explore the alleged conflict between truth claims and examine the roots of religion in human nature. Is it less ‘natural’ to be an atheist than to believe in God, or gods? On the other hand, if we can explain theism psychologically, have we explained it away. Can it still claim any truth? This book debates these and related issues.

The Transhumanism Handbook
2019-07-03 Newton Lee Modern humanity with some 5,000 years of recorded history has been experiencing growing pains, with no end in sight. It is high time for humanity to grow up and to transcend itself by embracing transhumanism. Transhumanism offers the most inclusive ideology for all ethnicities and races, the religious and the atheists, conservatives and liberals, the young and the old regardless of socioeconomic status, gender identity, or any other individual qualities. This book expounds on contemporary views and practical advice from more than 70 transhumanists. Astronaut Neil Armstrong said on the Apollo 11 moon landing in 1969, “One small step for a man, one giant leap for mankind.” Transhumanism is the next logical step in the evolution of humankind, and it is the existential solution to the long-term survival of the human race.

Theology and the Science of Moral Action
2012 American Academy of Religion. Conference The past decade has witnessed a renaissance in scientific approaches to the study of morality. Once understood to be the domain of moral psychology, the newer approach to morality is largely interdisciplinary, driven in no small part by developments in behavioural economics and evolutionary biology, as well as advances in neuroscientific imaging capabilities, among other fields. To date, scientists studying moral cognition and behaviour have paid little attention to virtue theory, while virtue theorists have yet to acknowledge the new research results emerging from the new science of morality. Theology and the Science of Moral Action explores a new approach to ethical thinking that promotes dialogue and integration between recent research in the scientific study of moral cognition and behaviour—including neuroscience, moral psychology, and behavioural economics—and virtue theoretic approaches to ethics in both philosophy and theology. More particularly, the book evaluates the concept of moral exemplarity and its significance in philosophical and theological ethics as well as for ongoing research programs in the cognitive sciences.

Ethics and Spirituality
2014 Charles E. Curran This volume compiles writings by leading moral theologians and ethicists on an important, emerging topic in the field of ethics. As spirituality asserts its broad humanistic interdisciplinarity, and moral theology emerges from its fixation on sin to address broader questions of human formation and Christian discipleship, the need for the two disciplines to be in dialogue is clear.

Cyborg Theology
2017-10-30 Scott A. Midson In particular, Donna Haraway argued in her famous 1991 ‘Cyborg Manifesto’ that people, since they are so often now detached and separated from nature, have themselves evolved into cyborgs. This striking idea has had considerable influence within critical theory, cultural studies and even science fiction (where it has surfaced, for example, in the Terminator films and in the Borg of the Star Trek franchise). But it is a notion that has had much less currency in theology. In his innovative new book, Scott Midson boldly argues that the deeper nuances of Haraway’s and the cyborg idea can similarly rejuvenate theology, mythology and
anthropology. Challenging the damaging anthropocentrism directed towards nature and the non-human in our society, the author reveals - through an imaginative reading of the myth of Eden - how it is now possible for humanity to be at one with the natural world even as it vigorously pursues novel, 'post-human', technologies.

Scripture, Tradition, and Reason in Christian Ethics

2019-09-24 Bharat Ranganathan How should we understand the relationship between Christian ethics and religious ethics? Among comparative, ethnographic, and normative methodologies? Between confessional and non-confessional orientations, or between theology and philosophy? This volume brings together emerging religious ethicists to engage the normative dimensions of Christian ethics. Focusing on scripture, tradition, and reason, the contributors to this volume argue for a vision of Christian ethics as religious ethics. Toward this end, they engage with scripture, interpretation, and religious practice; examine the putative divide between reason and tradition, autonomy and heteronomy; and offer proposals about the normative characterization of conceptual and practical issues in contemporary religious ethics. Collectively, the volume engages Christian thought to make an argument for the continuing relevance of normative methodologies in contemporary religious and theological ethics.

The Authority of the Gospel
2015-02-09 Robert Song Oliver O Donovan is widely regarded as one of the preeminent Protestant Christian ethicists of our time. His teaching and scholarship have exerted a profound influence on countless moral theologians. This volume honoring O Donovan shows how the various contributors -- themselves distinguished scholars -- have developed their own thinking through serious engagement with O Donovan's work. Significantly, they build upon, expand, and critique the agenda for Christian ethics that O Donovan has been instrumental in constructing. As Robert Song and Brent Waters say in their introduction, To genuinely honor O Donovan, one cannot remain content with reciting but must risk one's own exposition. Like other strategies used in treating health conditions, acupuncture may have some side effects. Medications have side effects and allergic reactions, surgeries have risk of infection and complications. For needle puncture, there is a risk of injury, rare infections, minor bleeding, small bruises, and some dizziness.

You can minimize the possible side effects by choosing a licensed acupuncturist. Most countries either have government licensing in place or have professional organizations with very strict rules and regulations.

**How do treatments go?**

An acupuncturist will do an initial evaluation of your medical history and your body’s current state. Multiple pressure points are palpated, and a regimen of treatment is formulated. Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.

**Low Cost Advertising**

There is no better advertisement campaign that is low cost and also successful at the same time. Great business ideas when utilized effectively can save lots of money. This is not only easy for those who work full-time as an advertiser, but also for those who work from home.

Advertising from home is also a low cost option, which involves making and distributing fliers. Usually potential customers will visit home for business dealing. Print good amount of fliers and give it to anyone who is visiting home like family, friends, mailman, etc. Business cards can also be distributed. Few selected people can be given sample of the product. For those who work outside home, employ college students to distribute fliers at supermarkets, community centers, or malls, especially on weekends, when there is a rush.

Spread the word by the mouth. Talk to everyone about the product and ask them to talk about it to others. It’s a very powerful tool to increase the network and doesn’t even cost anything. When receiving a casual call from family members and friends, don’t forget to tell them about the latest events, discounts and promotions and ask them about what they are up to. If the
parties are into the business, it won’t hurt to promote each other. Joint ventures can be started with trustable people of the same trade. The only cost that will be incurred during the whole process is of printing fliers. For a better quality, professional can be hired to design them, as they will be able to play with colors and write motivating material.

~Benefits of NICU Air Ambulance Services

A medical mission is always an important flight. The crew on an air ambulance takes each and every flight to heart and treats the patient as if they were one of the family. This fact is never more true than when the air ambulance contains a NICU patient.

There are few things in life scarier than knowing your child is in distress. The sight of a tiny newborn attached to wires and leads, tubes and IV drips, can be extremely disturbing. As new parents, such a vision tends to stab into their hearts, but rest assured that the tiny baby is in good hands. If the doctor orders travel via an air ambulance for the infant, know that the child will be receiving continuous medical monitoring and treatment during the entire trip, from bedside to bedside.

Each air ambulance specially staffed for NICU treatment has all the appropriate medical tools and equipment to do the job. Whether the NICU is on the ground or in the air, newborns receive the best care possible. Don’t fret that the child will be traveling with just a single nurse or basic EMT. In many cases, an entire NICU team will escort the child to the destination. Not for a mere second will the baby be lacking appropriate medical attention and care.

When we compare the merits of the two

kinds of activities, I believe that the recreational programs have more meat. Firstly, children
do not enjoy learning unless they themselves feel curious about something. Most academic
programs are standardized courses that are not too flexible. They have a general purpose and

a well laid out methodology. After a number of hours at school, the child may feel bored.
Further study may overwhelm him and make him feel frustrated. Burnout is very much a

possibility here.
Recreational programs provide a welcome break from the monotony of learning and studies.
The mental challenge and the physical exertion make the child feel a renewed zest and a

pleasant sense of fulfillment. Group activity teaches him social skills, discipline and patience.
It is a proven fact that children involved in extra curricular activities get better grades than

others. Sometimes closing the textbooks and playing a game may be the best way to handle

your studies.
Whatever program you choose for your child, regular evaluation is the key to success. You will
have to measure the childs progress. If progress is unsatisfactory, shift your child out of the

program. The child should also have the freedom to reject an activity if and when he feels
bored with it. Generally, programs that combine the educational with the recreational are best
suited especially for younger children. This way, children can have fun while they learn.

Recreational after school activities are a must if you feel that your child is beginning to put on
undesirable fat. It is better to begin these activities as early as possible. The more weight the
child gains, the harder he has to work to shed it. Football, swimming, skating and Karate are
just some activities he can participate in. Structured and disciplined exercise is possible only
when one is put into a formal environment. That is why an overweight child simply HAS to be
put into an after school program of this kind.

After school activity for the hyperactive child

ADHD refers to attention-deficit-hyperactivity-disorder. Most children who
suffer from this disorder suffer from attention problems as well as hyperactivity. Parents of
such children are well aware that inattention and hyperactivity continue throughout the day.
Keeping such children busy after school hours can be as difficult as keeping them safe during
the school day.
The first step while choosing the right after school activity for your child is to understand how
ADHD affects him. Is your child interested in sports? Is he put off by the fierce
competitiveness, or does he find it hard to get along with teammates? Does your child vocalize
his feelings, or is communication a problem?

After reading the description of a child you can request more information. Adoption Photo listing started in 1994 and over 8,000 children have appeared on it. The Adoption Photo list receives more than two million hits per month. Adoption photo listing is such a powerful way to motivate people even remotely interested in adopting. Many people have a statistic in the back of their minds, knowing that there are millions of children around the world without a home. But that's just it, it's just a statistic. With adoption photo listing it is no longer just a statistic it is reality. Adoption photo listing places a face where it used to be just a number. Not only does it become a picture, but adoption photo listing describes the child. It gives the child's age, birthdate, state of residence, and the child's likes and dislikes. Adoption photo listing is not only beneficial for the child wanting to be adopted, but also beneficial for the adoptive parents. This way the child gets his or her face out there for more to see. Also the adoptive parents have a chance to see pictures and learn about the children. What the children look like, what they like to do, where they come from and sometimes an update on how the child is doing emotionally. This gives the adoptive parents more to go on than just a picture or even a number. Adoption photo listing is not just of children for adoption, but also of families or couples that want to adopt. These adoptive parents have been thoroughly screened and have completed all of the prescreening assessments. Many of them have fertility problems, making it near impossible to have children on their own. These adoption photo listings give information such as the ages of the adoptive parents, when they were married, what their hobbies are and the information about any of the children they have whether they are biological or adopted. They also explain how much they would like to adopt and raise a child, and how wonderful it would be just to be considered for adopting.

Many agencies are not open about transracial adoption policies, because it is such a touchy subject. You should ask your agency about how they feel about it. Transracial adoption was the subject of a bill before Congress in 1994, and after an intense debate they found that they agreed on one thing, that all adults of all backgrounds need to help adopted children of all backgrounds reach their potential. Transracial adoption began after World War II, when there was a large number of children without a home or family. American adoptive couples were not always childless, but simply family oriented. Parents who adopt transracially can not ignore the fact that they become a minority family. They will be subjected to questions, odd looks, and prejudice remarks. Research shows that children raised in a transracial environment tend to handle the cultural gap extremely well, and that parents who adopt transracially have to work harder than same race parents, this way they can empower their children and teach them about different cultures and backgrounds.

All in all, transracial adoption could be a wonderful experience for the right family. You might have to work a little harder, but from what I have found it is all worth the effort.

Since 1982, acupuncture has found its way to the US. There are currently 50 schools that teach it and 3,000 licensed practitioners all over the country. Do you think you can be a licensed professional? Here are a few things to help you look for a good acupuncture school. You should now that the 50 schools mentioned are all accredited by the National Commission for Acupuncture and Oriental Medicine. It is recognized by the Department of Education and some of these schools even have a masters program. Most of these schools can be found online so you can give them a call and ask certain
questions about the school. You can find out the cost of tuition, the teacher student ratio, if the school offers consultation services to students and the alumni and if they have an extensive library which focuses on traditional Chinese medicine.

**Behind**

In the long-term scenario bruises, sprains and strains heal pretty quickly in kids and teenagers but it is important that the adolescent sticks to the restrictions imposed during the treatment and healing process like restriction of activity and regularly attending physical therapy sessions if any. It is noted that majority of the sports related injuries results either due to traumatic injury or excessive use of muscles and joints. But, they can be avoided and prevented with right training, by wearing right protective gears and by using right equipment for training.

**Tennis Elbow in Adolescents**

Tennis elbow is a condition in which tendon fibers that attach on epicondyle on the elbow’s exterior degenerates. The tendons talked about here anchor the muscles that help wrist and hand to lift. Although tennis elbow occurs mostly in patients of thirty to fifty years of age but it can happen to people of any age. Also tennis elbow affects almost fifty percent of teenagers who are in racquet sports thus the name “tennis elbow”. But still most of the patients who suffer with tennis elbow are people who don’t play racquet sports. Majority if the times there isn’t any specific injury before the symptoms start showing up. Tennis elbow can also happen to people who use their forearm muscles frequently and vigorously for day to day work and recreational activities. Ironically some patients develop the condition without any of the activity related reasons that leads to the symptoms. The symptoms of tennis elbow include severe burning pain on the elbow’s exterior region. In majority of the cases this starts as a slow and mild pain gradually worsening with the passage of few weeks or sometimes months. The pain worsens when one tries to lift objects. In some cases it may pain even while lifting light objects like a book or full coffee cup. In the severest cases it can pain even at the movement of the elbow.

**Miracle**

After all this exposure, women viewers identify themselves as the weaker sex. Some think that males decide their self-worth. Over exposure of women as sex objects have triggered cases of physical assault and rapes. Majority of the women are taking the wrong way to get those stick figures, which are results in diseases, sometimes leading to death. And most of this is attributed to the advertisements that pour into the lives of innocent people everyday. Marketing ethics should be built to raise the status of woman in the society and give them the
Writing a good headline for your advertisement

There is no denying the fact that the success of an advertisement lies mostly in the headline. The headline should attract the reader and make him read the rest of the advertisement. The headline should be simply catchy and various key points should be embedded when deciding on the headline for the ad.

The headline should catch attention of the eye at the first glance. Words in headlines should act as tags for the advertisement. It should say it all about the content that follows. If a company is selling reasonably priced furniture, the headline of their advertisement should be ‘Durable furniture for less price’. This headline will attract the right customers who are on a look out for durable furniture as well as low cost furniture. If the customers to be reached belong to a category that are interested in decorating their house with beautiful furniture and aren’t concerned about the price to get the right look, then the headline can be ‘Change how your house looks by our oriental furniture’. Anything other than the prospects should not be included in the headline. If both men and women can use a product, both of them should be referred to in the title, missing out even one of the category is like losing a huge number of potential customers.
