Earning and Learning Paul E. Barton, 1989 Since 1986, the National Assessment of Educational Progress (NAEP) has collected information from 11th-grade students about their employment activities. Out of the 29,000 students asked about work in the 1986 assessment, 54% reported working some amount of time each week, and over 28% reported working more than 15 hours per week. Thus, of 2.9 million 11th graders questioned in 1986, an estimated 1.6 million were employed and attending school. Data in this report cover the general characteristics and academic achievement of working students included in the NAEP as well as ancillary information from other studies. Student characteristics analyzed include gender, race/ethnicity, parents' education, high school program type, mathematics and science courses taken, postsecondary expectations, absenteeism, homework time, and television viewing time. Results indicate that: (1) employment has various effects on student achievement; (2) schools vary in the amount of time and effort they demand from their students, but it appears that some teachers lower their expectations regarding working students; (3) students' jobs should be examined in terms of content compatible with youth development and achievement; and (4) where work assignments are connected to schooling objectives, work can complement, rather than compete with, schooling objectives. Twenty-nine data tables and one graph are included. (TJH)

The Darkling Thrush Thomas Hardy,2021

Living as Learning James W. Garrison,Larry A. Hickman,Daisaku Ikeda,2014 Three experts collaborate in this passionate and rewarding dialogue on the legacy of the great American philosopher and educator John Dewey (1859 1952). Focused on growth and the creation of value within the context of real life, Dewey's pragmatic philosophy shares much with humanistic Buddhism. These similarities, which arise throughout the book, add richness to a dialogue already overflowing with faith in our capacity to find common ground and expand human well being in our rapidly globalizing world. For Dewey, individual and social potential alike are unlimited. Readers will come away ready to embrace rather than fear the increasing complexity of our world.
