Aircraft Maintenance Bruce R Aubin,2004-04-30 Since the origin of flight, the main goal of aircraft maintenance has been to efficiently correct defects and prevent failures. From the original days of manned or unmanned flight, the individuals and their processes to repair, modify, maintain, and service the vehicles that were used to rise above the ground have largely been unsung. Aircraft Maintenance is a comprehensive executive-summary-style report written for business professions,

engineers, mechanics, technicians, educators, and students that covers everything from history, evolution, evaluation and the future. Author Bruce R. Aubin examines and explains the processes and systems of aircraft maintenance that were developed to ensure the quality, viability, and safety of the people and machines committed to flight. Chapters cover: Aircraft Maintenance Organization and Structure Regulations and Environmental Effects on Maintenance Training Quality and Safety Planning and Scheduling Narrow- and Wide-body Aircraft and more

Introduction to Maintenance, Repair and Overhaul of Aircraft, Engines and Components Shevantha Weerasekera, 2020-12-29 Introduction to Maintenance, Repair and Overhaul of Aircraft, Engines and Components brings together the basic aspects of a fundamentally important part of the aerospace industry, the one that supports the global technical efforts to keep passenger and cargo planes flying reliably and safely. Over time, aircraft components and structural parts are subject to environmental effects, such as corrosion and other types of material deterioration, wear and fatigue. Such parts could fail in service and affect the safe operation of the aircraft if the degradation were not detected and addressed in time. Regular planned maintenance supports the current and future value of the aircraft by minimizing the physical decline of the aircraft and engines throughout its life. Introduction to Maintenance, Repair and Overhaul of Aircraft, Engines and Components was written by the industry veteran, Shevantha K. Weerasekera, an aerospace engineer with 20+ years of aircraft maintenance experience, who currently leads the engineering team of a major technical enterprise in the field.
