Bleeding London Geoff Nicholson, 1998-09-01 The author of *The City Under the Skin* maps out “a delightful fiction, and a wonderfully exasperated love letter to a great city” (Kirkus Reviews). Like any international metropolis, London draws the most diverse characters to its bustling streets. Meet Mick. He’s on his way to the smoke from the provinces. He’s got six guys to find with only their names to go on, a lust for vengeance, and a city guide. Meet Stuart. Determined to walk each of the capital’s roads, streets, and alleyways, he’s a man on a mission . . . but has no plan for when there’s nowhere left to go. Meet Judy. She’s determined to leave her mark on London—one lover at a time—creating a virtual A-Z of sex in the city. “A book whose setting becomes as much a character as the people who pepper its pages, *Bleeding London* is dark, droll, and suspenseful.” —Library Journal “As packed with strange characters and comic and menacing incidents and characters as any night-bus . . . Nicholson obviously boasts a rich and arcane knowledge of the city and exploits it to the full.” —The Times (London) “Nicholson’s *Bleeding London* is a dark, frayed and filthy place . . . filled with weird sex, arbitrary violence and obscure threat . . . He produces comic lines when you least expect them, making you laugh out loud.” —New Statesman “An ambitious, clever and witty novel which attacks its subject with verve and humor.” —Literary Review

Maps and Politics Jeremy Black, 2000-09-01 ?We all rely on the apparent accuracy and objectivity of maps, but often do not see the very process of mapping as political. Are the power and purpose of maps inherently political? *Maps and Politics*

addresses this important question and seeks to emphasize that the apparent 'objectivity' of the map-making and map-using process cannot be divorced from aspects of the politics of representation. Maps have played, and continue to play, a major role in both international and domestic politics. They show how visual geographical representations can be made to reflect and advance political agendas in powerful ways. The major developments in this field over the last century are responses both to cartographic progression and to a greater emphasis on graphic imagery in societies affected by politicization, democratization, and consumer and cultural shifts. Jeremy Black asks whether bias-free cartography is possible and demonstrates that maps are not straightforward visual texts, but contain political and politicizing subtexts that need to be read with care.

Urban Transport Planning (Routledge Revivals) Harry Dimitriou,2013-12-19 Originally published in 1992, this book discusses a contemporary growth in environmental awareness, reflected in an increasing concern about the pollution caused by motor cars.The author considers the problem of congestion bringing traffic to a halt in the major cities and the increasingly controversial nature of contemporary transport planning. Professor Dimitriou provides a thorough and incisive contemporary analysis and suggests some appropriate solutions for the future.

The Limits of Power A. Blowers,2017-01-31 A text which focuses on the relationship of local politicians and professional planners in the planning process, adopting a conceptual framework within which a series of case studies is analysed. It shows that where power is limited or diffuse, or liable to change, policy making can be uncertain or inconsistent. The book covers a wide range of planning policy, including transportation and land development and because the author has had both academic and political experience this gives his work a unique emphasis.

The Pleasure Gardens of Virginia Peter Martin,2017-03-14 Using a rich assortment of illustrations and biographical sketches, Peter Martin relates the experiences of colonial gardeners who shaped the natural beauty of Virginia's wilderness into varied displays of elegance. He shows that ornamental gardening was a scientific, aesthetic, and cultural enterprise that thoroughly engaged some of the leading figures of the period, including the British governors at Williamsburg and the great plantation owners George Washington, Thomas Jefferson, William Byrd, and John Custis. In presenting accounts of their gardening efforts, Martin reveals the intricacies of colonial garden design, plant searches, experimentation, and the problems in adapting European landscaping ideas to local climate. These writings also bring to life the social and commercial interaction between Williamsburg and the plantations, together with early American ideas about cultured living. While placing Virginia's gardening in the larger context of the colonial South, Martin tells a very human story of how this art both influenced and reflected the quality of colonial life. As Virginia grew economically and culturally, the garden became a projection of the gardener's personal identity, as exemplified by the endeavors of Washington and Jefferson at Mount Vernon and Monticello. In order to recapture the gardens as they existed in colonial times, Martin brings together paintings, drawings, and the findings of modern archaeological excavations. Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
