**Minorities in Science** Vijaya L. Melnick,2013-04-17 Change is the essence of progress. We now stand at the crossroads of our civilization where change is essential in the conduct of our institutions, in the plans and models we project for the future, and in the very patterns of our thinking if we are to survive as one nation under God . . . with liberty and justice for

all. Opportunity to participate and fulfill the responsibility of building the nation must be available to all citizens in a true republic. For the viability of governmental institutions, in a modern democratic nation state, rests on the diversity of the genius of her citizens, and this enables the nation to accommodate herself better to changes of the times. But if the nation becomes impervious to change and resistant to modify its institutions to keep in pace with the times, then the nation will indeed be doomed to wither and perish. History is replete with examples of civilizations that have gone that course. It is therefore our responsibility to insure that our government institutions are kept receptive to change and reflective of the needs and concerns of her citizenry. In America today, economic and social powers generally go to those who can claim a superior education and professional experience. As our society, and indeed the world, becomes increasingly dependent on science and technology, education in those fields becomes imperative to the power equation.

*Mobility for Smart Cities and Regional Development - Challenges for Higher Education* Michael E. Auer,Hanno Hortsch,Oliver Michler,Thomas Köhler,2022-01-27 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc
