Authority and Social Work
1971 Shankar A. Yelaja Social workers tend to regard the exercise of authority as inimical to the values and ethnics of their profession, yet authority is inherent in every social work relationship. This collection of readings brings together the best, published articles bearing on this basic problem which continues to concern social scientists. It contains twenty-six articles and essays examining in depth, and from different points of view, the concept and use of authority. The articles were carefully selected from the voluminous literature on the topic, and are presented here in a form that will be meaningful and interesting to student and field worker alike. The readings are organized into two parts: in the first, an analysis of the concept of authority is made with the help of social and behavioural science literature; in the second, the conceptual understanding is related to social work practice. Among the authors represented are Erich Fromm, Carl J. Friedrich, Chester I. Barnard, Max Weber, Elliot Study, Kurt and Elizabeth de Schweinitz, and Fritz Redl. The collection was designed as a text for students of social work, but it will be of equal benefit to practising social workers, and to others in the humanitarian professions.

Advancing Family Theories

2005 James M. White How can the study of families be scientific? What is the difference between postmodern and positivistic approaches? What is the role of models and metaphors in constructing our theoretical knowledge? In Advancing Family Theories, author James M. White addresses such difficult questions that have been longstanding issues within the field of family studies and examines these matters from a social science perspective. Advancing Family Theories explores two contemporary theories of the family-rational choice theory and transition theory. These diametrically different approaches illuminate what differing theories reveal about families. The book also discusses how meta-theories can assist in building and refining theory and offers insight on the understanding versus explanation debate. Advancing Family Theories gives students a precise notion of what a theory is and how theories work in
research. The book not only looks at philosophical realms but also examines particular substantive theory to explain and predict family behaviors.

Social Work Practice
1996-03-30 Bloomsbury Publishing Pardeck demonstrates that
the ecological approach to social work practice stresses effective intervention, and that effective intervention occurs through not only working with individuals, but also with the familial, social, and cultural factors that impact their social functioning. The power of the ecological approach, through focusing on multiple factors for assessment and intervention, is that it integrates empirically based theories from various fields including social work, psychology, sociology, and anthropology. Pardeck provides an orientation to the role of social work practitioners within the human services. He differentiates the unique contributions of social work and explains them in terms of the needs and goals of an ecological approach to practice. An ecological approach to practice stresses that effective social work intervention occurs through not only working with individuals, but also with the familial, social, and cultural factors that impact their social functioning. The power of the ecological approach, through focusing on multiple factors for assessment and intervention, is that it integrates empirically based theories from various fields including social work, psychology, and anthropology. The book represents an effort to define the goals, commitments, and approaches that have emerged out of the history of social work and to relate them to similar concepts and values that are central to an ecological approach to practice. Three pervasive and unifying themes run through the book. One is the constant commitment to goals of facilitating human development. Pardeck suggests this is a central ethic that defines and distinguishes an ecological approach to social work practice. The second theme is an affirmation of the basic utility of a systems approach in conceptualizing and intervening in human needs, concerns, and problems. The ecological perspective views human beings as social organisms engaged in patterns of relationships that nurture or inhibit this basic humanity. The third theme is an interactionist view of the importance of person-environment fit as a central dynamic in human functioning. The traditional intra-psychic
aspects of human behavior have tended to obscure the immense importance of both nurturing and potentially damaging forces at work in the social environment. This volume will be of considerable interest to social work educators and practitioners as well as their research libraries.

work with as an academic, tutor, practice educator and trainer...as well as student.” Michele Winter, Independent Social Worker & Teacher/Trainer, Social Care Training “I can wholeheartedly recommend this revised and updated edition of Barbra Teater’s highly successful book. It remains essential reading for practitioners, undergraduate and postgraduate students of social work. The book provides a compelling and easily accessible analysis of key theories and methods. It challenges both students and practitioners to consider and reconsider how they can apply theories and methods to practice more effectively.” Prof Hugh Mclaughlin, Manchester Metropolitan University, UK “What a great book – Barbra Teater and colleagues have managed to bring together a wealth of learning about different theories and methods of social work intervention in a clearly written and accessible format. Each chapter is focused on the application of theory to practice, and as such helps to act as a bridge from the classroom to direct work with individuals, families and groups. This new and updated edition is very likely to be one of those books that students have by their side throughout their studies, and bring with them into professional practice after graduation.” Dr John Devaney, Centenary Professor of Social Work, University of Edinburgh, UK

Macro Social Work Practice
2018-03-28 Michael Reisch Macro Social Work Practice: Working for Change in a Multicultural Society explores the dynamics and practice implications of increasingly diverse communities, organizations, and social service networks and helps students develop the skills to work successfully in these contexts. The book gives students the foundational skills and knowledge required for effective practice in social service and human organizations, healthcare settings, communities, social networks, and social movements. It emphasizes the relationship between structural and institutional inequalities and the experiences of individuals, families, communities, and organizations. Through case examples the book illustrates how principles of social justice, empowerment, and cultural awareness can be applied in different cultural contexts. Through various exercises, students will apply critical thinking to resolve practical and ethical dilemmas and make the type of difficult decisions that practitioners confront every day. The book also addresses how recent political events, cultural developments, and social changes have altered both the context and the content of macro social work practice in the United States. Macro Social Work Practice is appropriate for undergraduate and graduate courses in social work, family and community development, public health, nursing, and human services. Michael Reisch is the Daniel Thursz Distinguished Professor of Social Justice at the University of Maryland,

Shelters are a good source for finding small dogs to adopt, both pure bread and mixed breeds alike. The process is rather simple and generally requires an adoption fee and sometimes a pet owner check. This helps them to know what kind of pet owner you have been in the past. It is always a good idea to spend time with the dog before you adopt it. If you have children you should bring them along for the first orientation.

Some small dog breeds have breed specific medical conditions. For instance Daushounds of regular or miniature variety are more prone to back and hip problems. Some simple breed research will reveal most of these medical issues.

Another avenue for small dog adoption would be rescues. Some of the more popular breeds such as, bichon frise, Papillion, miniature pincher, dashound, Yorkshire, pug, Boston terrier etc.. Have breed specific rescues. Other rescues are more general and have mixed breeds as well. If after you have finished your research, you found that particular breed fits you better, this avenue would probably work best for you.

Using colorful font can multiply the cost to many times and is not worth the return. If the budget is low and the matter is confident enough, black font will be fine. Regular readers read the newspapers daily; therefore, there is no sense in placing the same ad in the same paper everyday. The advertisement can be placed in different papers everyday. The frequency can be three times a week for a particular newspaper. But there is an increase in the number of readers on weekends, so more money can be invested on placing advertisement in the weekend edition. Don’t be disappointed if all the advertisement space is sold on weekend. Insert fliers in between the pages of the newspaper.

As many advertisers will be posting their ads on weekends in the local newspaper and the chances of your ad getting lost in the muddle, the conventions can be twisted a little to
beat the competition. Place an offer coupon in the mid-week editorial and pay the local station to advertise and talk about the offer on their famous program. Ask them to specifically mention about the coupon placed in the newspaper. Out of the daily readers, only few of them go through the entire newspapers. Most of them view the first and last page. So instead of posting an ad thrice weekly in the middle pages, invest on placing the ad on the first or last page of the newspaper, once a week. Majority of the newspapers don’t give competitive protection, that is, an advertisement of a firm can be placed next to the advertisement of its competitor. Specify about this condition to the sales person and take the guarantee from them.

There is a decrease in the number of local newspapers every year. In United States, only about a thousand newspapers function on a daily basis. Local people are now relying on weekly papers or newspapers with the local section. Sometimes only one publisher controls many of the local newspapers. Newspapers for all the localities are printed at one place with only the front page being changed. When advertising in such publications, care should be taken on recognizing the audience that is being reached. All the effort and money is wasted if the wrong customer is reached and the result can go in loss. Mixing different medias instead one for advertising is a smart approach. One can take care of the shortcomings of the other and work in tandem to make the overall advertising campaign a huge success.

In Guatemalan adoptions you can be married, or single, meaning single men and single women can adopt. The only
real requirement is that the adopting parents be under the age of fifty years old. Referrals generally start around three to six months after your paperwork has been received. Once you accept a referral it takes about eight months for the adoption to become final.

An international protocol was endorsed by law makers, because the United States said they will stop allowing American parents adopt Guatemalan children. Guatemala has been told that it needs to make provisions of its secret systems. These systems have been criticized due to high adoptive cost and for payment being made to the women and young girls placing their children up for adoption. Guatemalan adoption is still probably on the better choices for single adoptive parents due to the flexibility of their current protocol. Also with private lawyers currently still in charge of a great deal of the process, this is also a good alternative for people currently turned down for domestic adoption.

When choosing to adopt a child, some prospective parents make the decision to partake in an international adoption. That is, they choose to adopt a child from a country other than their own. This process can be long and full of bureaucratic red tape, especially since it is a matter conducted entirely between the potential adoptive parents and a foreign court, which acts on behalf of the foreign government. The United States government cannot intervene on the parents behalf. There a few reasons and some benefits to this option, however.
