**Chad Hansen**

**Disputers of the Tao** A.C. Graham, 2015-12-15 A history of Chinese philosophy in the so-called Axial Period (the period of classical Greek and Indian philosophy), during which time China evolved the characteristic ways of thought that sustained both its empire and its culture for over 2000 years. It is comprehensive, lucid, almost simple in its presentation, yet backed up with incomparable authority amid a well-honed discretion that unerringly picks out the core of any theme. Garlanded with tributes even before publication, it has redrawn the map of its subject and will be the one essential guide for any future exploration. For anyone interested in the affinities between ancient Chinese and modern Western philosophy, there is no better introduction —Contemporary Review The book is an expression of first-rate scholarship, filled with deep insights into classical Chinese thought. At the same time, it provides a comprehensive and well-balanced discussion that is accessible to the general reader. It is the rare kind of book that will be used as a standard text in introductory courses and be regularly consulted and cited by specialists working in the field. —Philosophical Review For those who will read only one book on Chinese philosophy, A. C. Graham's *Disputers of the Tao* is it. —Journal of the History of Philosophy A. C. Graham (1919-1991) is considered by many to have been the leading world authority on Chinese thought, grammar, and textual criticism and the greatest translator of Chinese since Waley. He taught at the School of Oriental and African Studies, London University (where he was Professor of Classical Chinese until 1988) Yale, Ann Arbor, Tsing Hua, Brown, and Honolulu. He was a Fellow of the British Academy. His numerous works include *Two Chinese Philosophers* (1958), *Poems of the Late T'ang* (1965), *Chuang-tzu: the Seven Inner Chapters* (1981), and *Studies in Chinese Philosophical Literature* (1986).

**Disputers of the Tao** Angus Charles Graham, 1989 This history of the Classical period (500-200 BCE) presents a vision of this subject and acts as an introduction for the non-scholar, a comprehensive history for the student, and brimming with bold new insights for the specialist.

**Language and Logic in Ancient China** Chad Hansen, 2020-07-15 Guided by 20th century theories of language, Hansen's novel approach to interpretive theory launched the modern analytical study of Ancient Chinese philosophy. This 1983 publication challenged authority-based traditional religious accounts stemming from 18th and 19th century missionary

dictionaries and reliance on interpretive authority. Hansen shows that one tiny grammatical question... has profound implications for the understanding of Chinese philosophy. ...This is surely a decisive breakthrough ... a great success. His observations about Chinese thought in general are always stimulating and illuminating. A book which excites one to rethink things from the foundations. A. C. Graham An ambitious and provocative book concerning the relationship between language and thought in ancient China. ... a novel and powerful theory about the nature of classical Chinese language ... a better understanding of many issues in classical Chinese philosophy. P. J. Ivanhoe [The] importance of this book lies ... in its engaging style, novel ideas, and rigorous argumentation, which can serve as a model for future work in Chinese philosophy. Hansen takes Chinese philosophy seriously as philosophy. For anyone tired of the superficial summaries or scholastic commentaries that so often characterize this field, Hansen's book will be a memorable and welcome change. Michael Martin

**Tao Te Ching** Laozi,1972

*A Daoist Theory of Chinese Thought* Chad Hansen,2000-08-17 This ambitious book presents a new interpretation of Chinese thought guided both by a philosopher's sense of mystery and by a sound philosophical theory of meaning. That dual goal, Hansen argues, requires a unified translation theory. It must provide a single coherent account of the issues that motivated both the recently untangled Chinese linguistic analysis and the familiar moral-political disputes. Hansen's unified approach uncovers a philosophical sophistication in Daoism that traditional accounts have overlooked.

Yin-Yang and the Nature of Correlative Thinking Angus Charles Graham,2016-12-20 Revised Edition of A. C. Graham's *Yin-Yang and the Nature of Correlative Thinking* A classic study on the structure of correlative thinking, and of everyday thinking itself.

**Reading the Dao** Keping Wang,2011-02-03 An introductory guide to the *Dao de Jing*, exploring key themes and passages in this key work of Daoist thought.

*Poems of the Late T'ang* ,2008-01-22 Classical Chinese poetry reached its pinnacle during the T'ang Dynasty (618-907

A.D.), and the poets of the late T'ang-a period of growing political turmoil and violence-are especially notable for combining striking formal innovation with raw emotional intensity. A. C. Graham's slim but indispensable anthology of late T'ang poetry begins with Tu Fu, commonly recognized as the greatest Chinese poet of all, whose final poems and sequences lament the pains of exile in images of crystalline strangeness. It continues with the work of six other masters, including the "cold poet" Meng Chiao, who wrote of retreat from civilization to the remoteness of the high mountains; the troubled and haunting Li Ho, who, as Graham writes, cultivated a "wholly personal imagery of ghosts, blood, dying animals, weeping statues, whirlwinds, the will-o'-the-wisp"; and the shimmeringly strange poems of illicit love and Taoist initiation of the enigmatic Li Shang-yin. Offering the largest selection of these poets' work available in English in a translation that is a classic in its own right, *Poems of the Late T'ang* also includes Graham's searching essay "The Translation of Chinese Poetry" as well as helpful notes on each of the poets and on many of the individual poems.

**A Companion to World Philosophies** Eliot Deutsch, Ronald Bontekoe, 1999 Written by an international assembly of leading philosophers, this volume offers students, teachers and general readers a rich and sophisticated introduction to the major non-Western philosophical traditions - particularly Chinese, Indian, Buddhist and Islamic philosophies. African and Polynesian thinking are also covered by way of historical and contemporary survey articles. The text is organized around a series of central topics concerning conceptions of reality and divinity, of causality, of truth, of the nature of rationality, of selfhood, of humankind and nature, of the good, of aesthetic values, and of social and political ideals. Outstanding scholars present essays that articulate the distinctive ways in which these specific problems have been formulated and addressed in the non-Western traditions against the background of their varied historical and cultural presuppositions.

Wandering on the Way Tzu Chuang, 2000-04-01 In this vivid, contemporary translation, Victor Mair captures the quintessential life and spirit of Chuang Tzu while remaining faithful to the original text.

An Introduction to Chinese Philosophy Karyn L. Lai, 2008-07-31 This comprehensive introductory textbook to early Chinese philosophy covers a range of philosophical traditions which arose during the Spring and Autumn (722-476 BCE) and Warring States (475-221 BCE) periods in China, including Confucianism, Mohism, Daoism, and Legalism. It considers concepts, themes and argumentative methods of early Chinese philosophy and follows the development of some ideas in subsequent periods, including the introduction of Buddhism into China. The book examines key issues and debates in early Chinese philosophy, cross-influences between its traditions and interpretations by scholars up to the present day. The discussion draws upon both primary texts and secondary sources, and there are suggestions for further reading. This will be an invaluable guide for all who are interested in the foundations of Chinese philosophy and its richness and continuing

relevance.

**Myth and Philosophy** Lawrence J. Hatab, 1990 Hatab's work is more than an interpretative study, inspired by Nietzsche and Heidegger of the historical relationship between myth and philosophy in ancient Greece. Its conclusions go beyond the historical case study, and amount to a defence of the intelligibility of myth against an exclusively rational or objective view of the world.

*Literary Forms of Argument in Early China*, 2015-08-17 *Literary Forms of Argument in Early China* explores formal approaches to the study of philosophical texts to present new methods for the analysis of pre-modern thought in China. Attempts made by Chinese thinkers to generate literary forms of philosophical reasoning have gone unrecognised within scholarship in China and the West. Drawing together the expertise of leading scholars of early Chinese textuality, this volume addresses this omission by examining the formal characteristics of an argument, the interrelationship between form and content, as well as patterned compositions and non-linear semantic utterances. With these comprehensive new readings, the volume makes a landmark contribution to the study of written thinking in early China. Contributors include: Wim De Reu, Joachim Gentz, Christoph Harbsmeier, Martin Kern, Dirk Meyer, Michael Nylan, Andrew H. Plaks, David Schaberg, Rudolf G. Wagner.

*The Way of Chuang-tzŭ* Zhuangzi, Thomas Merton, 1965 Free renderings of selections from the works of Chuang-tzŭ, taken from various translations.

**Neo-Confucianism** Stephen C. Angle, Justin Tiwald, 2017-03-27 Neo-Confucianism is a philosophically sophisticated tradition weaving classical Confucianism together with themes from Buddhism and Daoism. It began in China around the eleventh century CE, played a leading role in East Asian cultures over the last millennium, and has had a profound influence on modern Chinese society. Based on the latest scholarship but presented in accessible language, *Neo-Confucianism: A Philosophical Introduction* is organized around themes that are central in Neo-Confucian philosophy, including the structure of the cosmos, human nature, ways of knowing, personal cultivation, and approaches to governance. The authors thus accomplish two things at once: they present the Neo-Confucians in their own, distinctive terms; and they enable contemporary readers to grasp what is at stake in the great Neo-Confucian debates. This novel structure gives both students and scholars in philosophy, religion, history, and cultural studies a new window into one of the world's most important philosophical traditions.

*To Become a God* Michael J. Puett, 2020-10-26 Evidence from Shang oracle bones to memorials submitted to Western Han emperors attests to a long-lasting debate in early China over the proper relationship between humans and gods. One pole of the debate saw the human and divine realms as separate and agonistic and encouraged divination to determine the will of the gods and sacrifices to appease and influence them. The opposite pole saw the two realms as related and claimed that humans

could achieve divinity and thus control the cosmos. This wide-ranging book reconstructs this debate and places within their contemporary contexts the rival claims concerning the nature of the cosmos and the spirits, the proper demarcation between the human and the divine realms, and the types of power that humans and spirits can exercise. It is often claimed that the worldview of early China was unproblematically monistic and that hence China had avoided the tensions between gods and humans found in the West. By treating the issues of cosmology, sacrifice, and self-divinization in a historical and comparative framework that attends to the contemporary significance of specific arguments, Michael J. Puett shows that the basic cosmological assumptions of ancient China were the subject of far more debate than is generally thought.

**Later Mohist Logic, Ethics, and Science** Angus Charles Graham, 1978 This a general account of the school of Mo-tzu, its social basis as a movement of craftsmen, its isolated place in the Chinese tradition, and the nature of its later contributions to logic, ethics, and science. It assesses the relation of Mohist thinking to the structure of the Chinese language, and grapples with the textual dynamics of later Mohist writings, particularly in regard to grammar and style, technical terminology, the use and significance of stock examples, and overall organization. Includes edited and annotated Chinese text with an English translation and commentary, a glossary, and a photographic reproduction of the unemended text from the Taoist Patrology.
