## **Assessing Progress on the Institute of Medicine Report The Future of Nursing**

2016-03-22 National Academies of Sciences, Engineering, and Medicine Nurses make up the largest segment of the health care profession, with 3 million registered nurses in the United States. Nurses work in a wide variety of settings, including hospitals, public health centers, schools, and homes, and provide a continuum of services, including direct patient care, health promotion, patient education, and coordination of care. They serve in leadership roles, are researchers, and work to improve health care policy. As the health care system undergoes transformation due in part to the Affordable Care Act (ACA), the nursing profession is making a wide-reaching impact by providing and affecting quality, patient-centered, accessible, and affordable care. In 2010, the Institute of Medicine (IOM) released the report *The Future of Nursing: Leading Change, Advancing Health*, which made a series of recommendations pertaining to roles for nurses in the new health care landscape. This current report assesses progress made by the Robert Wood Johnson Foundation/AARP Future of Nursing: Campaign for Action and others in implementing the recommendations from the 2010 report and identifies areas that should be emphasized over the next 5 years to make further progress toward these goals.

## How to Love a Country

2019-03-26 Richard Blanco A timely and moving collection from the renowned inaugural poet on issues facing our country and people—immigration, gun violence, racism, LGBTQ issues, and more. Through an oracular yet intimate and accessible voice, Richard Blanco addresses the complexities and contradictions of our nationhood and the unresolved sociopolitical matters that affect us all. Blanco digs deep into the very marrow of our nation through poems that interrogate our past and present, grieve our injustices, and note our flaws, but also remember to celebrate our ideals and cling to our hopes. Charged with the utopian idea that no single narrative is more important than another, this book asserts that America could and ought someday to be a country where all narratives converge into one, a country we can all be proud to love and where we can all truly thrive. The poems form a mosaic of seemingly varied topics: the Pulse nightclub massacre; an unexpected encounter on a visit to Cuba; the forced exile of 8,500 Navajos in 1868; a lynching in Alabama; the arrival of a young Chinese woman at Angel Island in 1938; the incarceration of a gifted writer; and the poet's abiding love for his partner, who he is finally allowed to wed as a gay man. But despite each poem's unique concern or occasion, all are fundamentally struggling with the overwhelming question of how to love this country.

## The Future of Nursing 2020–2030

---

2021-09-30 National Academies of Sciences Engineering and Medicine The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. *The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity* explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by *The Future of Nursing: Leading Change, Advancing Health* (2011) report.

## **Traumatic Brain Injury**

2022-05-15 National Academies of Sciences, Engineering, and Medicine Every community is affected by traumatic brain injury (TBI). Causes as diverse as falls, sports injuries, vehicle collisions, domestic violence, and military incidents can result in injuries across a spectrum of severity and age groups. Just as the many causes of TBI and the people who experience it are diverse, so too are the physiological, cognitive, and behavioral changes that can occur following injury. The overall TBI ecosystem is not limited to healthcare and research, but includes the related systems that administer and finance healthcare, accredit care facilities, and provide regulatory approval and oversight of products and therapies. TBI also intersects with the wide range of community organizations and institutions in which people return to learning, work, and play, including the education system, work environments, professional and amateur sports associations, the criminal justice system, and others. *Traumatic Brain Injury: A Roadmap for Accelerating Progress* examines the current landscape of basic, translational, and clinical TBI research and identifies gaps and opportunities to accelerate research progress and improve care with a focus on the biological, psychological, sociological, and ecological impacts. This report calls not merely for improvement, but for a transformation of attitudes, understanding, investments, and care systems for TBI.

2021-04-27 Rachel Michelberg ". . . an engaging exploration of duty, guilt, and self-preservation. . . . A clear-eyed consideration of difficult ethical and familial choices." —KIRKUS REVIEWS Rachel likes to think of herself as a nice Jewish girl, dedicated to doing what's honorable, just as her parents raised her to do. But when her husband, David, survives a plane crash and is left with severe brain damage, she faces a choice: will she dedicate her life to caring for a man she no longer loves, or walk away? Their marriage had been rocky at the time of the accident, and though she wants to do the right thing, Rachel doesn't know how she is supposed to care for two kids in addition to a now irrational, incontinent, and seizure-prone grown man. And how will she manage to see her lover? But then again, what kind of selfish monster would refuse to care for her disabled husband, no matter how unhappy her marriage had been? Rachel wants to believe that she can dedicate her life to David's needs, but knows in her heart it is impossible. *Crash* tackles a pervasive dilemma in our culture: the moral conflicts individuals face when caregiving for a disabled or cognitively impaired family

#### David's Crown

---

2021-01-29 Malcolm Guite As well as the name of a virus, a corona is a crown, the pearly glow around the sun in certain astronomical conditions and a poetic form where interlinking lines connect a sequence. It is the perfect name therefore for this new collection of 150 poems by the bestselling poet Malcolm Guite, each one written in response to the Bible's 150 psalms as they appear in William Coverdale's timeless translation. The Psalms express every human emotion with disarming honesty, as anger and thankfulness alike are directed at God. All of life is here with its moments of beauty and its times of despair and shame. Like the Psalms themselves, the poems do not avoid the cursing and glorying over the downfall of your enemies, but wrestle honestly with them as we do when we come to say them.

#### Engineering Eden

---

2016-06-07 Jordan Fisher Smith The fascinating story of a trial that opened a window onto the century-long battle to control nature in the national parks. When twenty-five-year-old Harry Walker was killed by a bear in Yellowstone Park in 1972, the civil trial prompted by his death became a proxy for bigger questions about American wilderness management that had been boiling for a century. At immediate issue was whether the Park Service should have done more to keep bears away from humans, but what was revealed as the trial unfolded was just how fruitless our efforts to regulate nature in the parks had always been. The proceedings drew to the witness stand some of the most important figures in twentieth century wilderness management, including the eminent zoologist A. Starker Leopold, who had produced a landmark conservationist document in the 1950s, and all-American twin researchers John and Frank Craighead, who ran groundbreaking bear studies at Yellowstone. Their testimony would help decide whether the government owed the Walker family restitution for Harry's death, but it would also illuminate decades of patchwork efforts to preserve an idea of nature that had never existed in the first place. In this remarkable excavation of American environmental history, nature writer and former park ranger Jordan Fisher Smith uses Harry Walker's story to tell the larger narrative of the futile, sometimes fatal, attempts to remake wilderness in the name of preserving it. Tracing a course from the founding of the national parks through the tangled twentieth-century growth of the conservationist movement, Smith gives the lie to the portrayal of national parks as Edenic wonderlands unspoiled until the arrival of Europeans, and shows how virtually every attempt to manage nature in the parks has only created cascading effects that require even more management. Moving across time and between Yellowstone, Yosemite, and Glacier national parks, *Engineering Eden* shows how efforts at wilderness management have always been undone by one fundamental problem--that the idea of what is "wild" dissolves as soon as we begin to examine it, leaving us with little framework to say what wilderness should look like and which human interventions are acceptable in trying to preserve it. In the tradition of John McPhee's *The Control of Nature* and Alan Burdick's *Out of Eden*, Jordan Fisher Smith has produced a powerful work of popular science and environmental history, grappling with critical issues that we have even now yet to resolve.

#### *Call Me American*

2019-05-07 Abdi Nor Iftin Abdi Nor Iftin first fell in love with America from afar. As a child, he learned English by listening to American pop and watching action films starring Arnold Schwarzenegger. When U.S. marines landed in Mogadishu to take on the warlords, Abdi cheered the arrival of these Americans, who seemed as heroic as those of the movies. Sporting American clothes and dance moves, he became known around Mogadishu as Abdi American, but when the radical Islamist group al-Shabaab rose to power in 2006, it became dangerous to celebrate Western culture. Desperate to make a living, Abdi used his language skills to post secret dispatches, which found an audience of worldwide listeners. Eventually, though, Abdi was forced to flee to Kenya. In an amazing stroke of luck, Abdi won entrance to the U.S. in the annual visa lottery, though his route to America did not come easily. Parts of his story were first heard on the BBC World Service and This American Life. Now a proud resident of Maine, on the path to citizenship, Abdi Nor Iftin's dramatic, deeply stirring memoir is truly a story for our time: a vivid reminder of why America still beckons to those looking to make a better life.

#### The Censored Pulpit

2019-10-16 Donyelle C. McCray Few have consoled the church as ably as the fourteenth-century mystic Julian of Norwich. However, her prophetic gifts have received little scholarly attention. Drawing on contemporary homiletical theory and the history of Christian spirituality, Donyelle C. McCray presents Julian as a preacher, examining the apostolic dimensions of Julian's vocation as an anchoress and highlighting the steps she took to align herself with renowned preachers like Saint Cecelia, Mary Magdalene, and the apostle Paul. Like Paul, Julian saw Jesus' body as her primary text, placed human weakness at the center of her theology, and used her own confined body as a rhetorical tool. Yet she navigated a web of censorship that threatened to silence her. To voice her convictions, Julian developed a novel approach to authority and exploited the fluidity of the medieval English sermon genre. McCray charts this process, revealing Julian as a central personality in the history of preaching whose best contemporary parallels operate outside the pulpit in august figures like retreat leader Evelyn Underhill, gospel singer Mother Willie Mae Ford Smith, and street preacher Reverend Billy.

#### The Future of Nursing

---

2011-02-08 Institute of Medicine The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles—including limits on nurses' scope of practice—should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

#### Liquor Store Theatre

2020-10-09 Maya Stovall For six years Maya Stovall staged Liquor Store Theatre, a conceptual art and anthropology video project—-included in the Whitney Biennial in 2017—-in which she danced near the liquor stores in her Detroit neighborhood as a way to start conversations with her neighbors. In this book of the same name, Stovall uses the project as a point of departure for understanding everyday life in Detroit and the possibilities for ethnographic research, art, and knowledge creation. Her conversations with her neighbors—which touch on everything from economics, aesthetics, and sex to the political and economic racism that undergirds Detroit's history—bring to light rarely acknowledged experiences of longtime Detroiters. In these exchanges, Stovall enacts an innovative form of ethnographic engagement that offers new modes of integrating the social sciences with the arts in ways that exceed what either approach can achieve alone.

#### Restoring the Balance

---

2009 Gail Guthrie Valaskakis First Nations peoples believe the eagle flies with a female wing and a male wing, showing the importance of balance between the feminine and the masculine in all aspects of individual and community experiences. Centuries of colonization, however, have devalued the traditional roles of First Nations women, causing a great gender imbalance that limits the abilities of men, women, and their communities in achieving self-actualization. Restoring the Balance brings to light the work First Nations women have performed, and continue to perform, in cultural continuity and community development. It illustrates the challenges and successes they have had in the areas of law, politics, education, community healing, language, and art, while suggesting significant options for sustained improvement of individual, family, and community well-being. Written by fifteen Aboriginal scholars, activists, and community leaders, Restoring the Balance combines life histories and biographical accounts with historical and critical analyses grounded in traditional thought and approaches. It is a powerful and important book.

### **AI and Humanity**

---

2020-03-10 Illah Reza Nourbakhsh An examination of the implications for society of rapidly advancing artificial intelligence systems, combining a humanities perspective with technical analysis; includes exercises and discussion questions. AI and Humanity provides an analytical framing and a common language for understanding the effects of technological advances in artificial intelligence on society. Coauthored by a computer scientist and a scholar of literature and cultural studies, it is unique in combining a humanities perspective with technical analysis, using the tools of literary explication to examine the societal impact of AI systems. It explores the historical development of these technologies, moving from the apparently benign Roomba to the considerably more sinister semi-autonomous weapon system Harpy. The book is driven by an exploration of the cultural and etymological roots of a series of keywords relevant to both AI and society. Works examined range from Narrative of the Life of Frederick Douglass, given a close reading for its themes of literacy and agency, to Simon Head's critique of the effects of surveillance and automation on the Amazon labor force in Mindless. Originally developed as a textbook for an interdisciplinary humanities-science course at Carnegie Mellon, AI & Humanity offers discussion questions, exercises (including journal writing and concept mapping), and reading lists. A companion website provides updated resources and a portal to a video archive of interviews with AI scientists, sociologists, literary theorists, and others.

### **The Dolphin Way**

---

2014-05-01 Shimi Kang In this inspiring book, Harvard-trained child and adult psychiatrist and expert in human motivation Dr. Shimi Kang provides a guide to the art and science of inspiring children to develop their own internal drive and a lifelong love of learning. Drawing on the latest neuroscience and behavioral research, Dr. Kang shows why pushy "tiger parents" and permissive "jellyfish parents" actually hinder self-motivation. She proposes a powerful new parenting model: the intelligent, joyful, playful, highly social dolphin. Dolphin parents focus on maintaining balance in their children's lives to gently yet authoritatively guide them toward lasting health, happiness, and success. As the medical director for Child and Youth Mental Health community programs in Vancouver, British Columbia, Dr. Kang has witnessed firsthand the consequences of parental pressure: anxiety disorders, high stress levels, suicides, and addictions. As the mother of three children and as the daughter of immigrant parents who struggled to give their children the "best" in life—Dr. Kang's mother could not read and her father taught her math while they drove around in his taxicab—Dr. Kang argues that often the simplest "benefits" we give our children are the most valuable. By trusting our deepest intuitions about what is best for our kids, we will in turn allow them to develop key dolphin traits to enable them to thrive in an increasingly complex world: adaptability, community-mindedness, creativity, and critical thinking. Life is a journey through ever-changing waters, and dolphin parents know that the most valuable help we can give our children is to assist them in developing their own inner compass. Combining irrefutable science with unforgettable real-life stories, *The Dolphin Way* walks readers through Dr. Kang's four-part method for cultivating self-motivation. The book makes a powerful case that we are not forced to choose between being permissive or controlling. The third option—the option that will prepare our kids for success in a future that will require adaptability—is the dolphin way.

#### **Holy Imagination**

2021-03-03 Prof. Judy Fentress-Williams The many voices in scripture form a dialogue with readers, which produce theological truths that are larger than the individual parts. This introduction is informed by both literary theory and theology. It groups sections of the whole Bible together by genre. Each section identifies and describes the genre (such as historiography, poetry, prophecy, gospel, letter, apocalypse), and then moves into a discussion about the literary characteristics and theological insights. The words of scripture not only come a long way to find us but like a poem must be read with attention. Poetry doesn't yield meaning easily, and it doesn't promise to make sense. We know to look past the words on the page and find the images, tropes, sounds, and metaphors that are meaning-full. This type of writing invites, rather demands, the imagination. We must accept that we will only get so close, but that this is close enough. Our imagination spans the gaps left by sparse language and incomplete narratives. We return again and again, with more information and perhaps more experiences. The words are the same, but we are not; and for that reason there are always new discoveries. "At last, an introduction that students will enjoy reading, because it is at once engaging, informative, and eye-opening, as well as completely lucid. Fentress Williams shows how many books of the Bible reflect the experience of marginalized persons and communities in precarious situations, and therefore how they speak in ways both realistic and encouraging to contemporary readers. Do your students and yourself a favor: adopt this text and get ready for serious conversation about ancient texts that never go out of date." - Ellen F. Davis, Amos Ragan Kearns Distinguished Professor of Bible and Practical Theology, Duke Divinity School

#### **To Make Men Free**

2014-09-23 Heather Cox Richardson From the New York Times bestselling author of Democracy Awakening, "the most comprehensive account of the GOP and its competing impulses" (Los Angeles Times) When Abraham Lincoln helped create the Republican Party on the eve of the Civil War, his goal was to promote economic opportunity for all Americans, not just the slaveholding Southern planters who steered national politics. Yet, despite the egalitarian dream at the heart of its founding, the Republican Party quickly became mired in a fundamental identity crisis. Would it be the party of democratic ideals? Or would it be the party of moneyed interests? In the century and a half since, Republicans have vacillated between these two poles, with dire economic, political, and moral repercussions for the entire nation. In *To Make Men Free*, celebrated historian Heather Cox Richardson traces the shifting ideology of the Grand Old Party from the antebellum era to the Great Recession, revealing the insidious cycle of boom and bust that has characterized the Party since its inception. While in office, progressive Republicans like Teddy Roosevelt and Dwight Eisenhower revived Lincoln's vision of economic freedom and expanded the government, attacking the concentration of wealth and nurturing upward mobility. But they and others like them have been continually thwarted by powerful business interests in the Party. Their opponents appealed to Americans' latent racism and xenophobia to regain political power, linking taxation and regulation to redistribution and socialism. The results of the Party's wholesale embrace of big business are all too familiar: financial collapses like the Panic of 1893, the Great Depression in 1929, and the Great Recession in 2008. With each passing decade, with each missed opportunity and political misstep, the schism within the Republican Party has grown wider, pulling the GOP ever further from its founding principles. Expansive and authoritative, *To Make Men Free* is a sweeping history of the Party that was once America's greatest political hope -- and, time and time again, has proved its greatest disappointment.

#### **Assigning Responsibility for Children's Health When Parents and Authorities Disagree: Whose Child?**

2021-10-25 Allan J. Jacobs This book provides a multidisciplinary analysis of the potential conflict between a government's duty to protect children and a parent(s)' right to raise children in a manner they see fit. Using philosophical, bioethical, and legal analysis, the author engages with key scholars in pediatric decision-making and individual and religious rights theory. Going beyond the parent-child dyad, the author is deeply concerned both with the interests of the broader society and with the appropriate limits of government interference in the private sphere. The text offers a balance of individual and population interests, maximizing liberty but safeguarding against harm. Bioethics and law professors will therefore be able to use this text for both a foundational overview as well as specific, subject-level analysis. Clinicians such as pediatricians and gynecologists, as well as policy-makers can use this text to achieve balance between these often competing claims. The book is written by a physician with practical and theoretical knowledge of the subject, and deep sympathy for the parental and family perspectives. As such, the book proposes a new way of evaluating parental and state interventions in children's' healthcare: a refreshing approach and a useful addition to the literature.

#### **The Lost Colony and Hatteras Island**

2020-06-15 Scott Dawson New archeological discoveries may finally solve the greatest mystery of Colonial America in this history of Roanoke and

Hatteras Islands. Established on what is now North Carolina's Roanoke Island, the Roanoke Colony was intended to be England's first permanent settlement in North America. But in 1590, the entire population disappeared without a trace. The only clue to their fate was the word "Croatoan" carved into a tree. For centuries, the legend of the Lost Colony has captivated imaginations. Now, archaeologists from the University of Bristol, working with the Croatoan Archaeological Society, have uncovered tantalizing clues to the fate of the colony. In *The Lost Colony and Hatteras Island*, Hatteras native and amateur archaeologist Scott Dawson compiles what scholars know about the Lost Colony along with what scholars have found beneath the soil of Hatteras.

#### **Syncretism and Christian Tradition**

---

2020-11-10 Ross Kane Syncretism has been a part of Christianity from its very beginning, when early Christians expressed Jesus' Aramaic teachings in the Greek language. Defined as the phenomena of religious mixture, syncretism carries a range of connotations. In Christian theology, use of syncretism shifted from a compliment during the Reformation to an outright insult in the twentieth and twenty-first centuries. The term has a history of being used as a neutral descriptor, a pejorative marker, and even a celebration of indigenous agency. Its differing uses indicate the challenges of interpreting religious mixture, challenges which today relate primarily to race and revelation. Despite its pervasiveness across religious traditions, syncretism is poorly understood and often misconceived. Ross Kane argues that the history of syncretism's use accentuates wider interpretive problems, drawing attention to attempts by Christian theologians to protect the category of divine revelation from perceived human interference. Kane shows how the fields of religious studies and theology have approached syncretism with a racialized imagination still suffering the legacies of European colonialism. *Syncretism and Christian Tradition* examines how the concept of race figures into dominant religious traditions associated with imperialism, and reveals how syncretism can act a vital means of the Holy Spirit's continuing revelation of Jesus.

#### *Empathy and the Novel*

2007-04-19 Suzanne Keen Does empathy felt while reading fiction actually cultivate a sense of connection, leading to altruistic actions on behalf of real others? *Empathy and the Novel* presents a comprehensive account of the relationships among novel reading, empathy, and altruism. Drawing on psychology, narrative theory, neuroscience, literary history, philosophy, and recent scholarship in discourse processing, Keen brings together resources and challenges for the literary study of empathy and the psychological study of fiction reading. Empathy robustly enters into affective responses to fiction, yet its role in shaping the behavior of emotional readers has been debated for three centuries. Keen surveys these debates and illustrates the techniques that invite empathetic response. She argues that the perception of fictiveness increases the likelihood of readers' empathy in part by releasing them from the guarded responses necessitated by the demands of real others. Narrative empathy is a strategy and subject of contemporary novelists from around the world, writers who tacitly endorse the potential universality of human emotions when they call upon their readers' empathy. If narrative empathy is to be taken seriously, Keen suggests, then women's reading and responses to popular fiction occupy a central position in literary inquiry, and cognitive literary studies should extend its range beyond canonical novels. In short, Keen's study extends the playing field for literature practitioners, causing it to resemble more closely that wide open landscape inhabited by readers.

#### *Neoliberal Governance and Health*

2016-09-01 Jessica Polzer Provoking urgent questions about the politics of health in the twenty-first century, this collection interrogates how neoliberal approaches to governance frame health and risk in ways that promote individual responsibility and the implications of such framings for the well-being of the collective. The essays examine a range of important issues, including childhood obesity, genetic testing, HPV vaccination, Aboriginal health, pandemic preparedness, environmental health, disability policy, aging, contingent work, and women's access to social services. With specific attention to the Canadian context, contributors reveal how neoliberal practices and policies shape the health experiences of individuals, disadvantaged groups, and communities by cultivating self-discipline while further exposing to harm the lives and bodies of those already marginalized in consumer society. Building on the theoretical conceptualizations of power and government of French philosopher Michel Foucault, the case studies extend our understanding of the effects of neoliberal practices and policies in relation to social class, gender, racialized identity, colonization, and ability, and provide insight into how health-related discourse creates new requirements for citizenship and forms of social stratification. A timely intervention in the field of health studies, *Neoliberal Governance and Health* establishes the need for critical interdisciplinary scholarship to counter the individualizing and marginalizing tendencies of health-related policy, practice and research.

#### **The Deeper the Roots**

2021-11-16 Michael Tubbs "Insightful, emotional, and enraging. By sharing his story in gripping detail, Michael Tubbs embodies an old feminist tradition whereby the personal is political. He empowers us to fight for equal opportunities for our communities, and encourages us to amass the courage to overcome loss and injustice." —Ibram X. Kendi, National Book Award-winning author of *Stamped from the Beginning* and *How to Be an Antiracist* The making of a visionary political leader—and a blueprint for a more equitable country "Don't tell nobody our business," Michael Tubbs's mother often told him growing up. For Michael, that meant a lot of things: don't tell anyone about the day-to-day struggle of being Black and broke in Stockton, CA. Don't tell anyone the pain of having a father incarcerated for 25 years to life. Don't tell anyone about living two lives, the brainy bookworm and the kid with the newest Jordans. And also don't tell anyone about the particular joys of growing up with three "moms"—a Nana who never let him miss church, an Auntie who'd take him to the library any time, and a mother, "She-Daddy", who schooled him in the wisdom of hip-hop and taught him never to take no for an answer. So for a long time Michael didn't tell anyone his story, but as he went on to a scholarship at Stanford and an internship in the Obama White House, he began to realize the power of his experience, the need for his perspective in the halls of power. By the time he returned to Stockton to become, in 2016 at age 26, its first Black mayor and the youngest-ever mayor of a major American city, he knew his story meant something. *The Deeper the Roots* is a memoir astonishing in its candor, voice, and clarity of vision. Tubbs shares with us the city that raised him, his family of badass women, his life-changing encounters with Oprah Winfrey and Barack Obama, the challenges of governing in the 21st century and everything in between—en route to unveiling his compelling vision for America rooted in his experiences in his hometown.

By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

#### **Recreational after school programs**

After school programs can be divided into 3 broad categories: academic, recreational and social. Balanced development takes place when there is compatibility between the physical, mental as well as the educational achievements of the child. As the name suggests recreational after school programs are based on a sport or recreation. Some of the more common physical activities include football, swimming and basketball. Some clubs offer programs like gymnastics, trekking and hiking. In this case, youngsters are often given a short class in first-aid class also.

Recreational after school programs offer children an opportunity to let off some steam and to destress themselves. The closed classroom atmosphere and a day full of textbooks and writing cause the child to repress his natural enthusiasm. He curbs his energy when he is required to sit quietly in class and learn. Physical activity is an all-time low during such times. This physical lethargy and inaction is countermanded by recreational activities. Growing concerns of obesity and child diabetes make it necessary for children to indulge in some strenuous exercises that will allow them to work up some sweat.

Transformation Resources Beverly Gorman Dine Traditional Healer Talks About The Covid 19 Vaccine In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

#### Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

Getting to know community heroes is an excellent experience for children. Teachers can use this opportunity for children to write a letter to the crew or other heroes in the local community. Older children may find the experience intriguing and be interested in learning more about volunteering or becoming an EMT. Grasping a child's natural curiosity could lead to a career in the medical field or as a pilot in the years to come.

If your community has not set up an opportunity to tour an air ambulance, then consider checking into this as a project through school, Scouts, or other organizations.

For older children, it may be possible to schedule a chance to ride in the air ambulance as an observer. High school students interested in a medical career may relish the opportunity to job shadow in this position.

**Project Resources Beverly Gorman Dine Traditional Healer Talks About The Covid 19 Vaccine.** When a pilot is forced to fly at lower altitudes, the transit time is lengthened. When time is of the essence, patients cannot afford to waste time. Jets having RVSM are able to fly at higher altitudes and save precious time. In some instances, this can make the difference between life and death.

Another negative side to flying without RVSM includes more fuel stops. With each landing and takeoff for fuel, more time is spent circling the airport, taxiing, and fueling up the plane. Waiting for more fuel can spend time that some patients don't have to spare. Selecting an air ambulance service that flies with RVSM can save time and offer patients and family peace of mind.

More turbulence is frequently experienced at lower altitudes when compared to flying with RVSM. Turbulence can compromise the safety of the patient. This can be avoided using RVSM technology on the air ambulance flight permitting the aircraft to fly above the turbulence. Choppy flights can also become uncomfortable and unpleasant for patients. Selecting an air ambulance service that has RVSM on their jets will ensure the highest possible comfort for the patient.
