When the paper work for the adoption records is final and the judge has signed it, depending on what form of adoption they have done the adoption record is sealed and completely confidential, or is left open for all to see. If the adoption record is sealed it generally stays that way until the adopted child comes of age.

**Resources for Adopted Individuals**
Adoption is a life-changing event for all involved, from the birth parents who make the brave decision to give their child up, to the adoptive parents who make an equally brave decision to welcome that child as their own. Yet one group which may go overlooked is that of the adopted children themselves. There are a number of issues that can arise for these individuals.
If the child was adopted at a very young age, they may not even know they were adopted until adolescence, or even later. A possible conflict in identity may result, as these children have spent so much time in an identity which they may perceive to no longer be valid. Children who were adopted late enough in life to be cognizant of the process can have their own issues, as well, perhaps wondering why their original parents didnt keep them, or having trouble accepting their adoptive parents as legitimate. Children adopted by parents of an ethnic, racial, or cultural group other than their own often face a unique conflict as they try to reconcile the two identities internally.

After school, many of them relax on the sofa with packets of chips, cool drinks or chocolates while they watch T.V. 30% of the kids below the age of 19 are considered overweight, and about 15% of these are obese. An after school program ensures that the child shakes off his lethargy and keeps himself busy. This also helps to reduce the child's fascination for T.V and computer games. After school activities that promote social awareness develop the individual's sense of social responsibility. It is seen that these sorts of programs not only keep kids out of trouble, but also help to produce responsible citizens. To that extent, they are valuable building blocks in a child's personality.

This is done by the insertion of hair-thin, disposable needles in specific areas on a person’s body to induce bodily harmony and bring about healing.

Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.
