The Rediscovery of Synchronous Reluctance and Ferrite Permanent Magnet Motors

2016-04-28 Gianmario Pellegrino This book offers an essential compendium on the analysis and design of synchronous motors for variable-speed applications. Focusing on synchronous reluctance and ferrite permanent-magnet (PM) synchronous reluctance machines, it provides a broad perspective on three-phase machines for variable speed applications, a field currently dominated by asynchronous machines and rare-earth PM synchronous machines. It also describes synchronous reluctance machines and PM machines without rare-earth materials, comparing them to state-of-the-

art solutions. The book provides readers with extensive information on and finite element models of PM synchronous machines, including all relevant equations and with an emphasis on synchronous-reluctance and PM-assisted synchronous-reluctance machines. It covers ferrite-assisted machines, modeled as a subcase of PM-assistance, fractional slot combinations solutions, and a quantitative, normalized comparison of torque capability with benchmark PM machines. The book discusses a wealth of techniques for identifying machine parameters, with an emphasis on self-commissioning algorithms, and presents methods for automated machine design and optimization, including a software tool developed for this purpose. Addressing an important gap in the field of PM-less and less-PM electrical machines, it is intended as a self-contained reference guide for both graduate students and professional machine designers, and as a useful text for university courses on automated and/or optimized design of electrical machines and drives.

Inverting The Pyramid

2018-08-14 Jonathan Wilson "An outstanding work the [soccer] book of the decade." -- Sunday Business Post Inverting the Pyramid is a pioneering soccer book that chronicles the evolution of soccer tactics and the lives of the itinerant coaching geniuses who have spread their distinctive styles across the globe. Through Jonathan Wilson's brilliant historical detective work we learn how the South Americans shrugged off the British colonial order to add their own finesse to the game; how the Europeans harnessed individual technique and built it into a team structure; how the game once featured five forwards up front, while now a lone striker is not uncommon. Inverting the Pyramid provides a definitive understanding of the tactical genius of modern-day Barcelona, for the first time showing how their style of play developed from Dutch "Total Football," which itself was an evolution of the Scottish passing game invented by Queens Park in the 1870s and taken on by Tottenham Hotspur in the 1930s. Inverting the Pyramid has been called the "Big Daddy" (Zonal Marking) of soccer tactics books; it is essential for any coach, fan, player, or fantasy manager of the beautiful game.

Hollywood Highbrow

2018-06-05 Shyon Baumann Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

When you travel by air, you can fly from New York off to Guarulhos International Airport in Sao Paulo and through North Star Air Taxi through a charter flight off to Fortaleza. By land, you can ride a bus hailing from the central bus station of Fortaleza off and head to the place called 'Jijoca' and ride to a four-wheel drive off to Jeri for about 6 hours.

Many people prefer going to more luxurious and popular places without considering those that could offer exciting adventure and interesting places to visit. Nowadays, when you talk about people missing things that are right under their noses—Im talking about missing out on a good place to go to for a vacation. Some people spend too much of their time looking away to places like France, Italy, London etc. etc. when some of the good places to go to are just a border away in Mexico. Though we must admit not all of Mexico is for the sight seers, there are many places in the heartland of Mexico that are not really for tourist and their vacation getaways. Some are cruel realities of life that really require the attention of the government. Mexico is a really nice place to be in because of the virgin forests and the beautiful beaches, but if there would be any improvement in the tourism scene in Mexico, it has to start now.

Anyway, one of the few places that really deserve hats off is a place called San Blas, Mexico. Long before Spanish settlers set foot in this little gateway to California, people have already started settling here. Some people speculate that the lost civilization of the Incas may have been from there once.

It may not be as popular as Cancun but it does hold it own brand of notoriety especially for birds. Yes thats right birds. Many of the bird watching enthusiast flock to this little barrio surrounded by forests, lagoons, mangroves and endless islets that serve as excellent breeding grounds for both exotic and local species of birds.

Can Family Travel With the Patient in an Air Ambulance?

When a loved one is dealing with serious medical conditions, everyone wants to help and be supportive. The family of the patient wants to be involved and informed about what is going on. Just like the doctors and medical staff, a patients loving family wants what is best for the

patient. When the patient must be transported, many issues of concern arise. If a loved one must fly in an air ambulance, can someone from the family come along for support? The goal of transporting the patient is often to reach qualified healthcare quickly and conveniently. This is especially true for many patients whose lives are dependent on the speed in which they get to the appropriate hospital and treatment. In some cases, the patient will fly in an air ambulance just a short distance to a local hospital, in other cases, a patient may travel across the globe for medical services.

For Free Attacking Soccer A Tactical Analysis By Massimo Lucchesi,Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

The best part about acupuncture is that there are no harmful side effects and no chance for an addiction to occur. The patient will have to come back for regular treatment and have to pay attention to one's diet and exercise regularly as needles can only do so much to control one's weight.

The number of treatments for someone who is overweight varies depending on how many pounds they want to lose, the speed at which they want to lose it and their commitment to sticking to the plan.

The average patient on the other hand who wants to lose 5 to 10 pounds will have to come for treatment every three days or twice a week then once this is attained, once every two weeks. It is up to the person until when the treatment will be done which shows that acupuncture can help you lose weight.

Before placing a billboard advertisement in a particular area it's better that a research is done

about the interest of the people in and around that area. Like if the advertiser desires to post a billboard advertisement on a highway, he can choose the advertisement on a motel, cafeteria, or gas station. Depending on the locality specific potential customers should be targeted. The cost is really reasonable. It varies from \$1,000 to \$3,000 per month. Ten advertisements will cost around \$ 30,000. It might look like a big amount, but it costs almost same if placing a full-page ad in a newspaper for only a day. And if the effectiveness is considered for both the methods, newspaper advertisements are not even half as effective as billboard advertisements. When an advertisement is placed in a newspaper or in a magazine, the customer should reach out to see the advertisement, but when an advertisement is placed on a billboard, it is like reaching to the customers.

Thus, Billboard advertising has high-impact on people and is a cost-effective method of advertisement. The above-mentioned advantages are few of the many advantages of billboard advertising. And that's the reason why all types of companies and businesses are choosing to go with billboard advertising. From placing the billboard at a theater multiplex, highway, airport, and even pasting them on cars, any kind of product can be advertised to any kind of audience. And the effectiveness of it can never be underestimated.

The title should be instant product seller. According to a research, five times more readers read just the headline when compared to those who read the complete advertisement. So the investment is of no use, if the title isn't good enough to sell the product. There can be a possibility that the content of the ad isn't strong enough. All the harm can be undone by having a powerful headline.

The headline should be centered on the product and not the company that is selling the product. The customer's interest should be reflected and he should feel that he is directly addressed. Start with 'you' and not 'we'. So if the client specified on mentioning the company's name, don't start the sentence with it. For example, instead of writing 'Tylenol - solution for sever cold ', write 'Got sever cold? Try Tylenol'. Never forget to mention the name of the product in the headline. The product name should be of top priority.
