**Economics** David K. H. Begg, Stanley Fischer, Rudiger Dornbusch, 2005 Aims to teach students how economics really works in the world.

Mathematics for Economics and Finance Martin Anthony, Norman Biggs, 1996-07-13 Mathematics has become indispensable in the modelling of economics, finance, business and management. Without expecting any particular background of the reader, this book covers the following mathematical topics, with frequent reference to applications in economics and finance: functions, graphs and equations, recurrences (difference equations), differentiation, exponentials and logarithms, optimisation, partial differentiation, optimisation in several variables, vectors and matrices, linear equations, Lagrange multipliers, integration, first-order and second-order differential equations. The stress is on the relation of maths to economics, and this is illustrated with copious examples and exercises to foster depth of understanding. Each chapter has three parts: the main text, a section of further worked examples and a summary of the chapter together with a selection of problems for the reader to attempt. For students of economics, mathematics, or both, this book provides an introduction to mathematical methods in economics and finance that will be welcomed for its clarity and breadth.

**EU Cohesion Policy** John Bachtler, Peter Berkowitz, Sally Hardy, Tatjana Muravska, 2016-10-26 The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315401867>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. This book brings together academics, members of European institutions, and regional and national level policymakers in order to assess the performance and direction of EU Cohesion policy against the background of the most significant reforms to the policy in a generation. Responding to past criticisms of the effectiveness of the policy, the policy changes introduced in 2013 have aligned European Structural and Investment Funds with the Europe 2020 strategy and introduced measures to improve strategic coherence, performance and integrated development. EU Cohesion Policy: Reassessing performance and direction argues that policy can only be successfully developed and implemented if there is input from both academics and practitioners. The chapters in the book address four important issues: the effectiveness and impact of Cohesion policy at European, national and regional levels; the contribution of Cohesion policy to the Europe 2020 strategy of smart, sustainable and inclusive growth; the importance of quality of government and administrative capacity for the effective management of the Funds; and the inter-relationships

between institutions, territory and place-based policies. The volume will be an invaluable resource to students, academics and policymakers across economics, regional studies, European studies and international relations.

Maths for Economics Geoff Renshaw,2012 Maths for Economics provides a solid foundation in mathematical principles and methods used in economics, beginning by revisiting basic skills in arithmetic, algebra and equation solving and slowly building to more advanced topics, using a carefully calculated learning gradient.

Features of this edition include: Topical and up-to-date material, presented alongside real-world examples and policy problems Mini case studies taken from disciplines such as construction, sport and computing, to demonstrate the practical application of economics Increased microeconomic coverage; including separate chapters on supply, demand and markets, to provide students with a thorough grounding in these fundamental areas A revised structure to the macroeconomics section, beginning with growth, cycles, and issues, before introducing analysis and explanations Learning outcomes and recaps in each chapter, allowing students to track their progress and understanding through the text Key terms, clearly defined throughout each chapter Review questions and answers in each chapter, to test understanding and application of the topics covered An easy-to-navigate layout and design, with clearly signposted features and photos and figures to illustrate important concepts Succinctly offering the proven quality, consistency and clarity of the parent text Economics ('The Student Bible' BBC Radio 4), Foundations of Economics, fourth edition is the essential text for today's non-specialist economics student.
